

Pressing the date button, top left, reveals shortcuts to the different phases of the timeline.

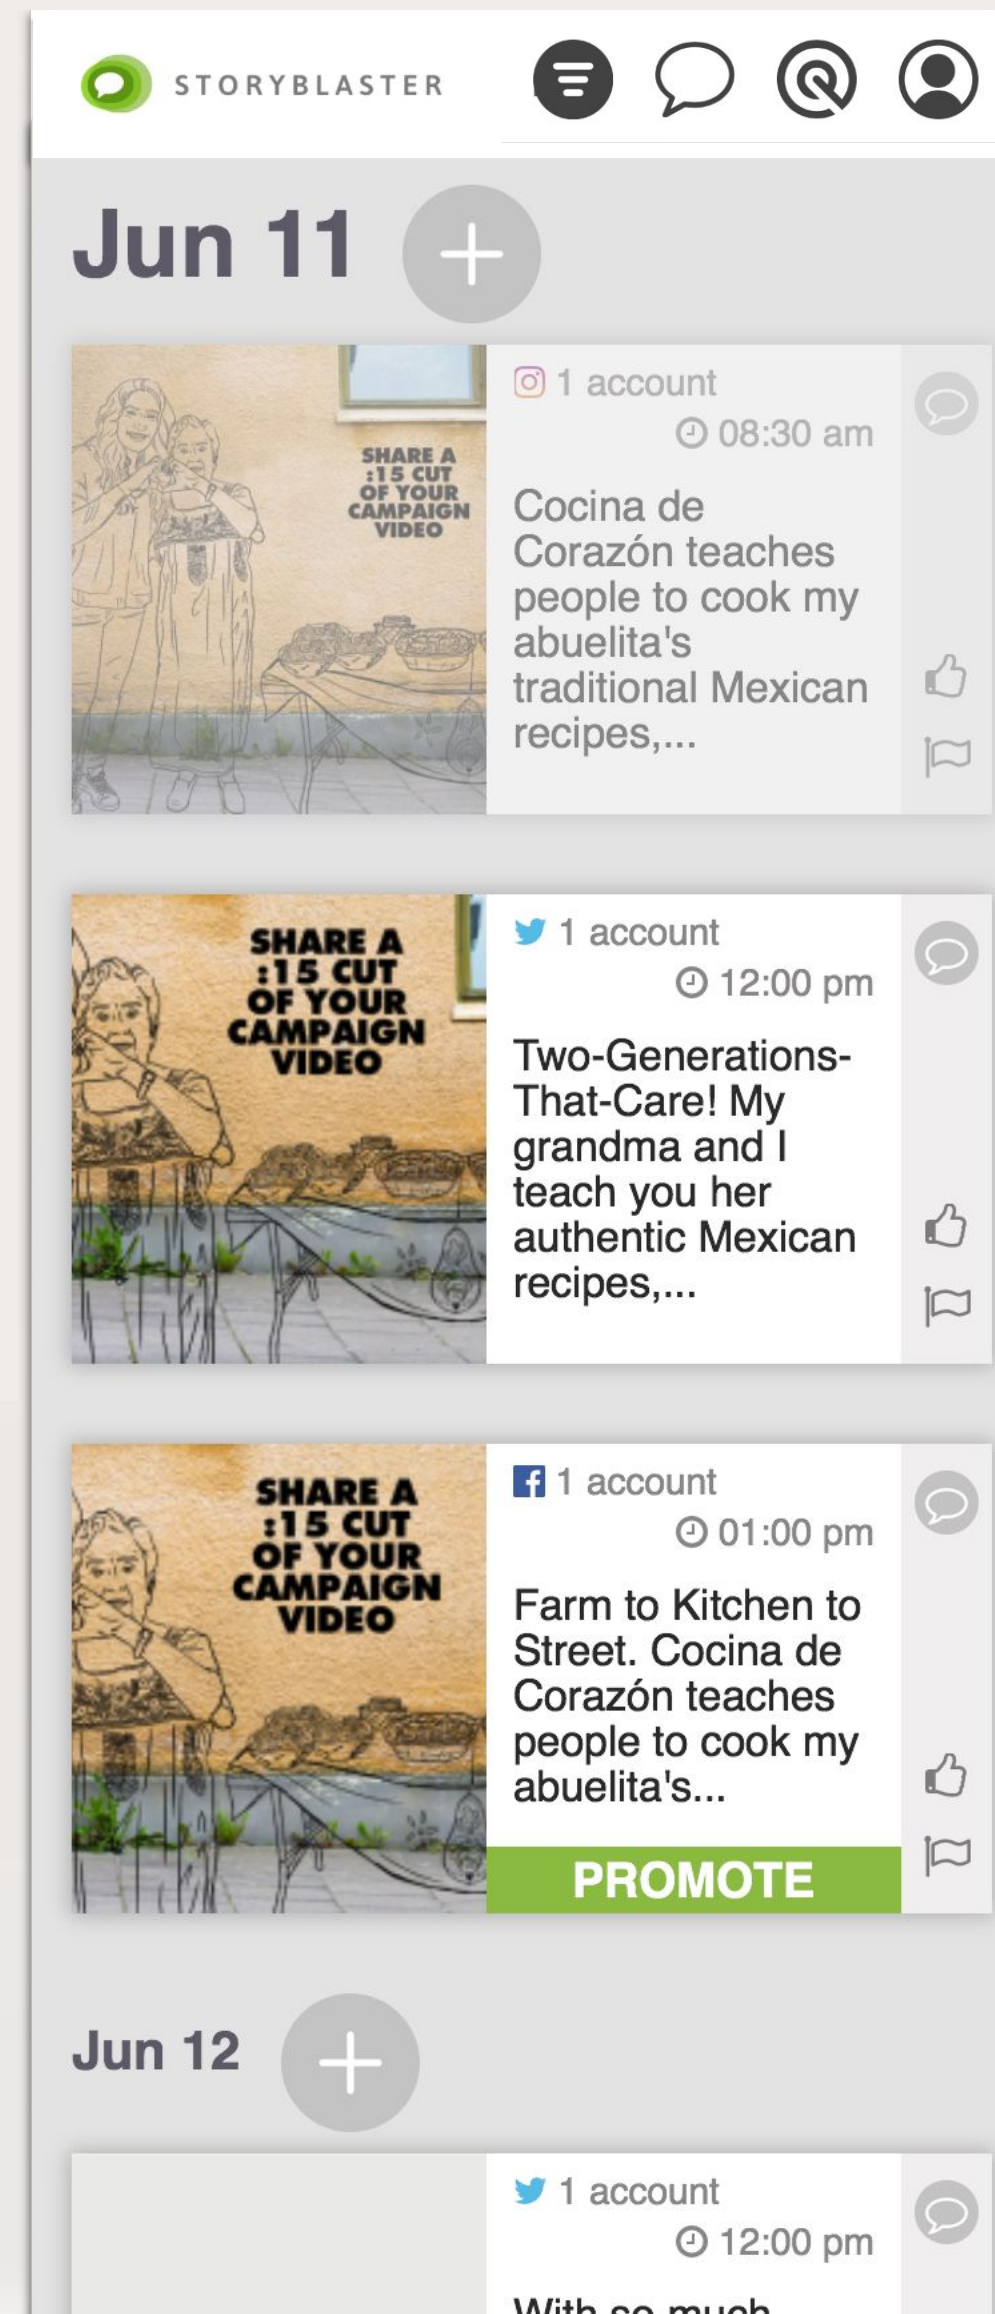

They can be dismissed by swiping left, tapping outside their area, or selecting a day.

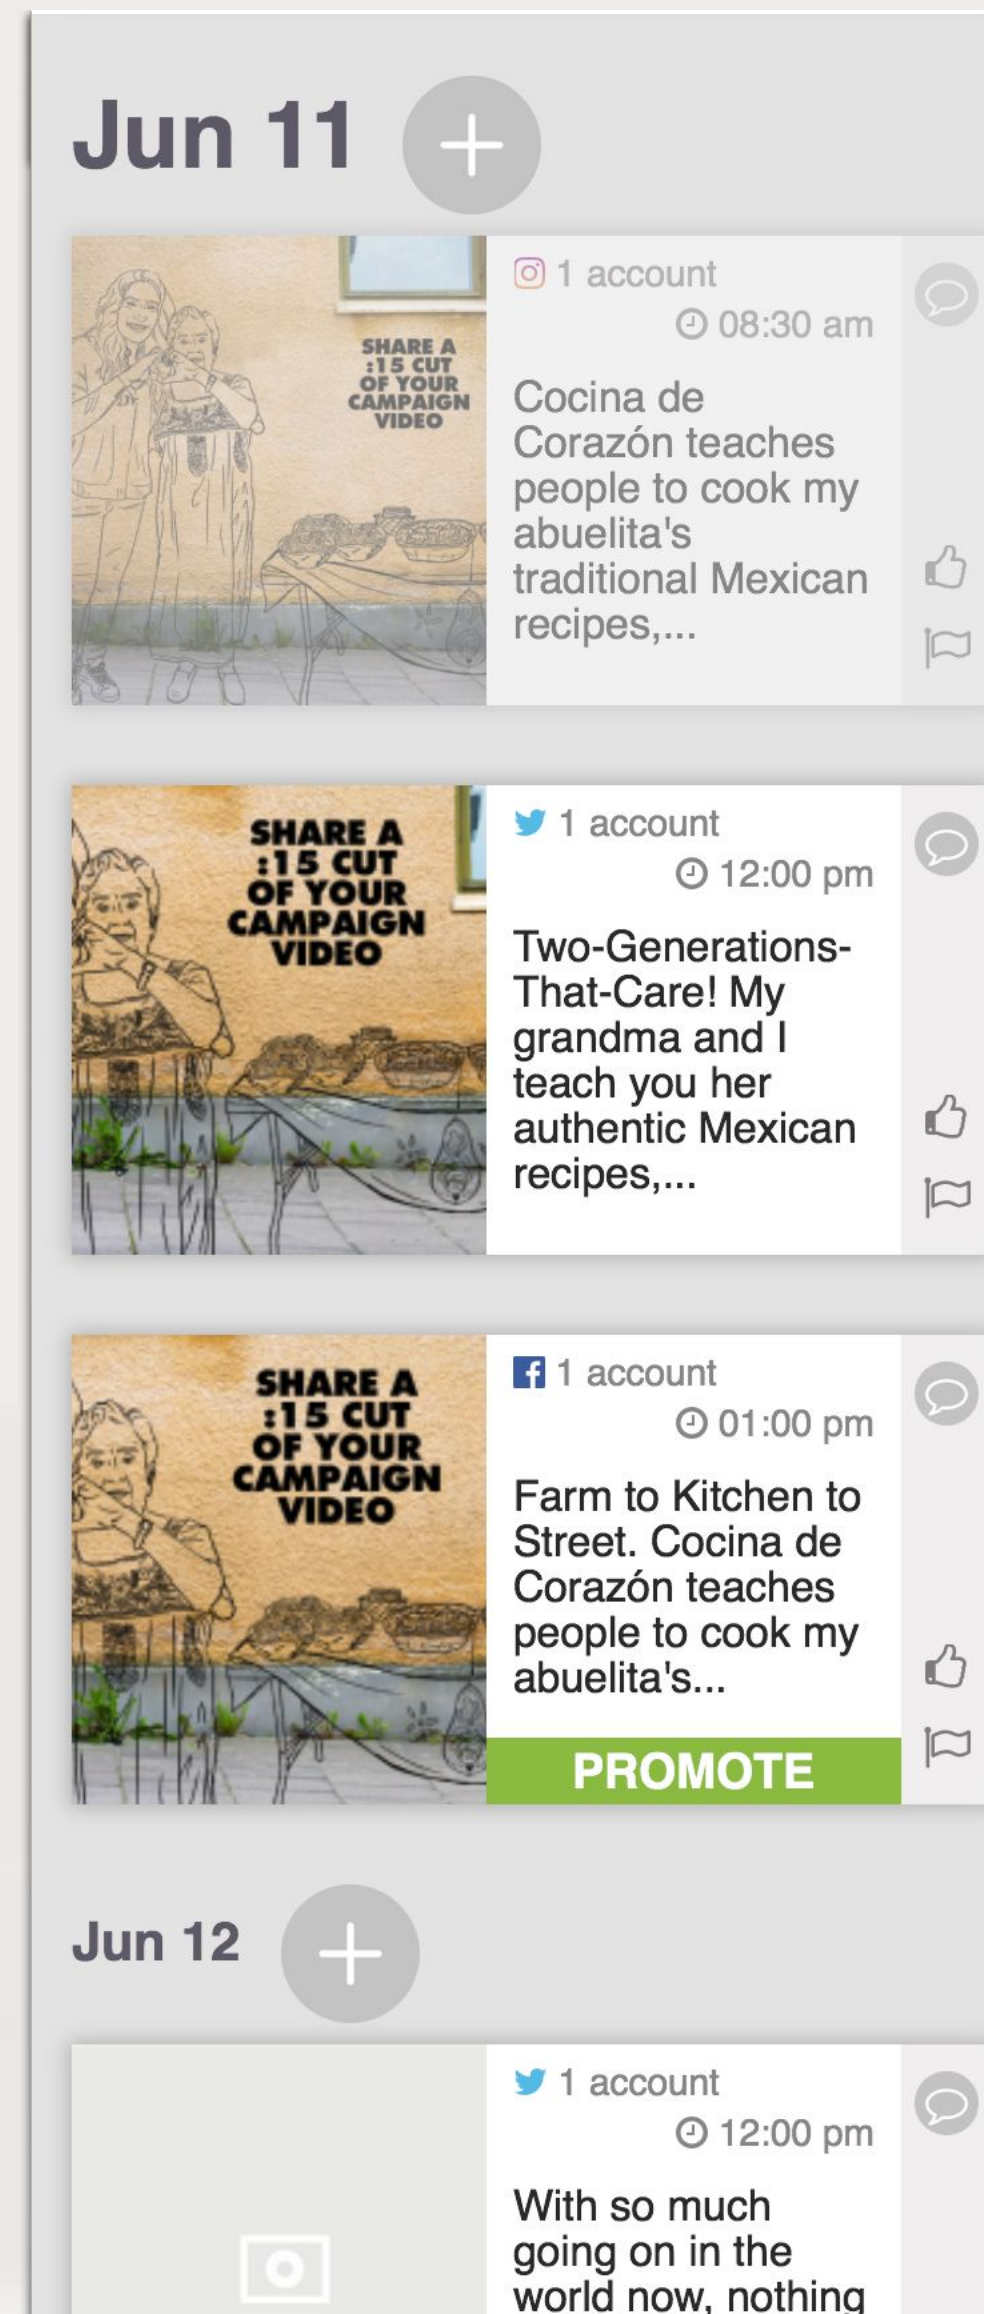

Pressing the hamburger animates the logo to the left, pushing out the date button, and bringing in the options.

Swiping up will push the navigation off the top of the screen.

Swiping down brings it back.
Tapping anywhere at the top edge of the
screen auto-scrolls to Today.
