[impea.org](http://www.imc-impea.org).

#### 4. About the Screening and Selection Process

1. Applications are accepted throughout the year.
2. Screenings will be conducted from time to time.
  1. The Journal is published twice a year (July and October). However, additional journals may be published if, in our judgment, there are many excellent projects.
  2. Selected works will be published as journals in Research Paper at [www.imc-impea.org](http://www.imc-impea.org) and IMC's Head Director will present you with a certificate.
  3. The selected author of the work will be registered as the author of the journal and will be sent an ISBN. Entering the ISBN when applying to college or graduate school will be beneficial in helping the student stand out during the admission process.
  4. Before publication, the author must confirm that there is nothing wrong with the copyright before proceeding with the publication.
  5. Approximately 7 to 10 papers will be selected per journal.
