

# Cyber security specialist

# Specializing field

Simply speaking, cyber security specialists analyze a platform or a website and look into potential leaks from which your app, website or platform could be accessed or systems could be ruined. Also, as far as I know, some companies hire such people to crack their systems to find out the weak links

## What this profession requires?

Education is required. At least a bachelor's degree in computer science and, usually, 5 years of experience in a related occupation and sometimes you have to go through internship before getting a job

## Average Wage and future demand

An average specialist in this field makes 102000\$ per year or over 40\$ per hour. Demand for this job is going to grow by 33% by 2030 and the reason is obvious. Lots of things will be at least partially digitalized and somebody needs to take care about keeping it safe

The image features five individuals, each wearing a white Guy Fawkes mask and a black suit with a white shirt and black tie. They are arranged in a row against a black background. The person in the center is slightly more prominent, with their hand near their chin. The text "Thanks for your attention!" is overlaid in red across the middle of the image.

**Thanks for your attention!**
