

# Cyber security specialist

# Specializing field

Simply speaking, cyber security specialists analyze a platform or a website and look into potential leaks from which your app, website or platform could be accessed or systems could be ruined. Also, as far as I know, some companies hire such people to crack their systems to find out the weak links

## What this profession requires?

Education is required. At least a bachelor's degree in computer science and, usually, 5 years of experience in a related occupation and sometimes you have to go through internship before getting a job

## Average Wage and future demand

An average specialist in this field makes 102000\$ per year or over 40\$ per hour. Demand for this job is going to grow by 33% by 2030 and the reason is obvious. Lots of things will be at least partially digitalized and somebody needs to take care about keeping it safe

The image features five men dressed in black suits, white shirts, and black ties, each wearing a white Guy Fawkes mask. The masks have a stylized face with a thin mustache, rosy cheeks, and a slight smile. The man in the center is adjusting his tie with his right hand. The background is solid black, and the lighting is dramatic, highlighting the suits and masks.
