

We are teenagers!

adolescence

The boundaries of adolescence roughly coincide with the education of children in high school and cover the age from 10 - 15 years

Internet addiction

In today's world, teenagers are increasingly becoming addicted to the Internet. The reason for this is accessibility. Nowadays, most common things can be done online more quickly and easily

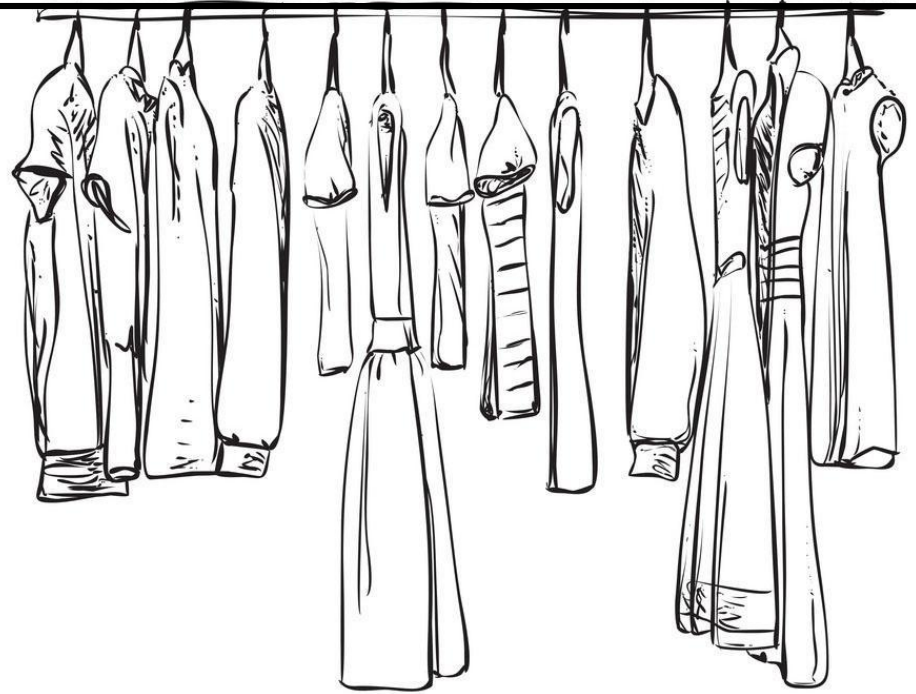

money

Teenagers are so interested in money because they want to buy more than people of a different age group. They need to show off to their friends! Everyone spends money differently. Some are interested in going to the movies with friends, and some are willing to pay tens of thousands for video games.

fashion

Just don't rush to say that the concept of "fashion" applies more to girls. Many guys love and adore fashion. They are even ready to spend all their savings on new things. And they do not think that there is anything shameful in this. Guys also like to look great, stepping only in step with fashion trends.

thanks for watching !
