

My Student live

My name is Akbota. I graduated from Aviation College this year. I am currently a student of Abay Kazakh National University.
I want to tell you about my student life.

Student life is interesting with both joys and sorrows.
Becoming a student for the first time is a step into a new life.
Studying away from your parents was not easy.
But thanks to the good teachers of my friends, I quickly got used
to student life.
I had the most positive and best classmates in college.

My student life was very cool. I took an active part in every holiday. I always remember college because it is the place where I first felt student life, found new friends.

This year I graduated from college and continue to study in the specialty that I want.

I hope that my student life at the university will be interesting and joyful.

The first goal of a student is to get an education, to become a quality specialist. I dream of becoming a strong specialist, having successfully spent my student life at the university. I wish you to be good specialists too.
