

My dream house

Made by Amin Bronnikov

Checked by Anastasia Lebedenko

High-tech house

The house of my dreams is a house in hi-tech style, I find this style the most comfortable for me because I find this style the most comfortable and cozy for myself

Inside

Inside the house should be made in a minimalist style, I don't like when the house is overloaded with furniture and other things

The house should have a living room, a kitchen, a shower, a room for me and my housemate

All rooms should be in a minimalist style with the exception of one...

My personal

«Man-cave»

What is “Man-cave”

A room, a space, a corner or an area of a dwelling specially designated for a man to be in a secluded state, away from the rest of the family, to work, play, engage in certain hobbies, activities without interference. This area is usually decorated by a man who uses it without the intervention of any female influence.
