About me

You can give a brief description of the topic you want to talk about here. For example, if you want to talk about Mercury, you can say that it's the smallest planet in the entire Solar System

A close-up photograph of a person's hands writing in a spiral-bound notebook. The person is holding a light-colored pen. The notebook is open, and the page has some handwritten text. The background is softly blurred, showing what appears to be a person's arm and hand. The overall lighting is warm and natural. There are several decorative purple elements overlaid on the image: a large leaf-like shape on the left, several small birds in flight, and various plus signs scattered throughout. A purple rounded rectangle in the upper right contains the text.

My work
- Area 1

Project 1

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it's only a bit larger than our Moon. The planet's name has nothing to do with the liquid metal, since Mercury was named after the Roman messenger god
