

# Life abroad version China

DONE BY:IMANUROVA RAKHIMA

# People's Republic of China

- ▶ China is located east of the Asian continent. The east of the country is bordered by the Pacific Ocean and the rest of the borders are shared with many neighboring countries. Its vast territory allows to find a great diversity of natural landscapes, from the plain to the mountains, the desert to the forests, small rivers with long rivers, from the sea to the big lakes ... It is difficult not to find what we love in China. With a history of over 5000 years and its many ethnic groups, China also offers a wide cultural panel with many faces to discover.

# Why did I come to China?

- ▶ it was interesting to visit a country that ranks 3rd in area. China is very rich in history. there are many sights. I came as a tourist to know the world, especially China. I came to improve my Chinese pronunciation features. It was interesting to listen to how the Chinese themselves talk.

# Where did I stay ?

- ▶ **Four Seasons Hotel Hangzhou At West Lake**
- ▶ Luxurious rooms blend traditional Chinese and modern styles
- ▶ Within ornate gardens on the banks of picturesque West Lake, this upscale hotel is 5 km from both the 5-story Leifeng Pagoda, and the caves and statues of Feilai Peak.  
Upgraded rooms have terraces with garden views. Suites add living rooms, and swanky villas feature screening rooms and hot tubs.

# Attraction of China

- ▶ The magnificent Great Wall of China - known in Chinese as 'Changcheng', or the 'Long Wall' - stretches more than 6,000 kilometers
- ▶ It was while digging wells on the outskirts of Xi'an in the 1970s that farmers stumbled across what was to be China's most important archeological find: the Terracotta Army. Distributed over three large underground pits and built to guard the First Emperor's tomb, the find included more than 8,000 life-size warriors, some 520 horses, and more than 100 chariots.
- ▶ No visit to China would be complete without at least one panda experience. While the country's top zoos boast many fine specimens of these fascinating creatures, the best place to see them in a close approximation to their natural habitat is at the excellent Research Base of Giant Panda Breeding in Chengdu, located in the province of Sichuan.
