$$5 - 3 = 2$$

разность

?

# Разность и её значение

$6 - 4 = 2$

$7 - 1 = 6$

$9 - 8 = 1$

$8 - 3 = 5$

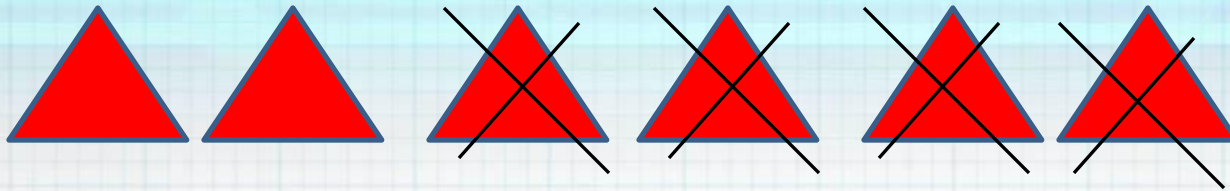

$5 - 0 = 5$

$4 - 4 = 0$

**разности**

The diagram illustrates the concept of difference and its value. On the left, five apples are shown in a row. The first three are crossed out with a diagonal line, and a blue bracket above them indicates a group of three. The last two are not crossed out, and a blue bracket below them indicates a group of two. A blue box with a red question mark is positioned above the first group. To the right, a subtraction equation is shown:  $5 - 3 = 2$ . A blue bracket under the numbers 5 and 3 is labeled "разность" (difference). Another blue bracket under the number 2 is labeled "Значение разности" (value of the difference) in red text. A second blue box with a red question mark is positioned above the number 2.

# № 2

$$6 - 4 = 2$$

разность    значение  
                  разности

# Т. стр. 7 № 1

$3 < 5$

$2 + 3 = 5$

$1 < 10$

$\underline{7 - 1}$

$\underline{8 - 3} = \underline{5}$

$1 + 5$

$\underline{7 - 2}$

$8 + 2 = 10$

$\underline{4 - 4}$

$\underline{9 - 4} = \underline{5}$

$6 > 3$

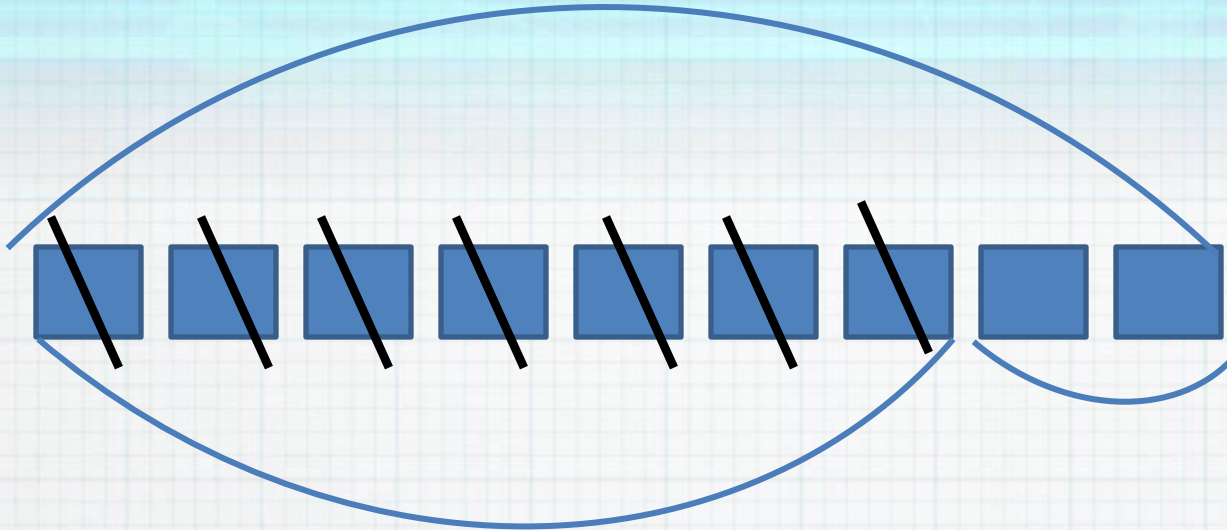

$\underline{5 - 3} = \underline{2}$

$5 > 3$

$\underline{10 - 5} = \underline{5}$

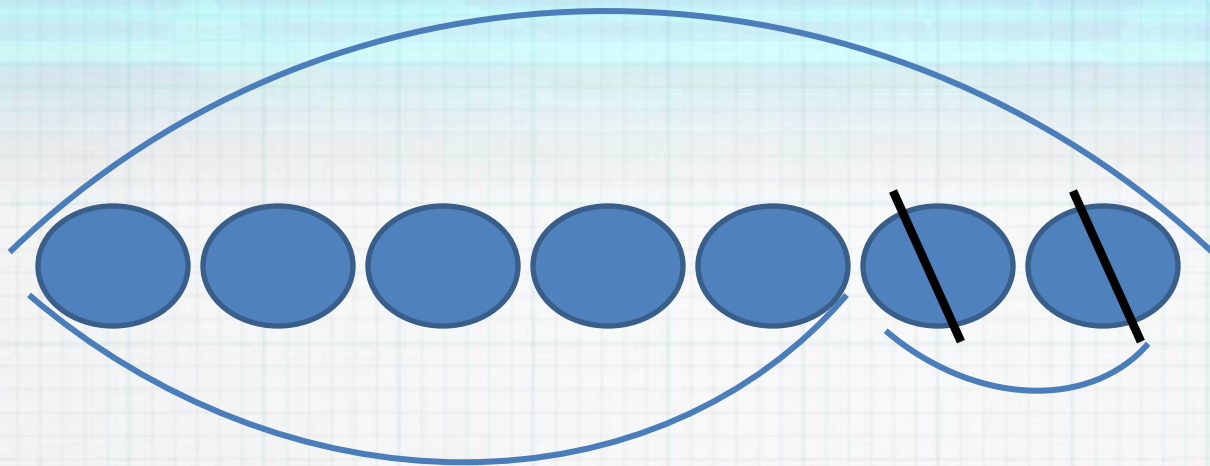

$\underline{6 - 5}$

Т. с. 8 № 4

$$9 - 7 = 2$$

T. c. 9 № 7

$$7 - 2 = 5$$
