What is a balanced diet for Healthy Kids?

- The Dietologists in Australia (DGCA) Guidelines for Children and Adolescents recommends that for best healthy children should enjoy a wide variety of nutritious foods. This means eating different food types.
 - Variety also refers to choosing a range of food from within each food group, particularly from the plant-based food groups (Fruit, Vegetables and Legumes and Breads and Cereals).
- 

The Australian Guide to Healthy Eating (AGHE).

- The AGHE is a guide to the amounts and types of food that are necessary to get enough of the nutrients needed for good health and wellbeing.
 - The AGHE is divided into five food groups that provide important nutrients the body needs. These are referred to as “everyday” foods and are:
- 

Breads, cereals:

Why is it important for children to eat breads and cereals?

- Breads and cereals are good sources of fibre, carbohydrates, protein and a wide range of vitamins and minerals. Most importantly, this group should form the main source of energy in the diet.
- How many serves of breads and cereals do the children need to eat?

For children, offer a variety of types of breads and cereals each day – rice, oats, wheat and corn. Try to include wholegrain products.

Vegetables and legumes:

Why is it important for children to eat vegetables and legumes?

- Vegetables are very high in vitamins and minerals. Vitamin A is offered in many vegetables. Nutrients are good for our bodies, because they can fight off bacteria and diseases. Vegetables are also low in fat and high in fiber.
 - They are good sources of vitamins, minerals and antioxidants.
- 

Fruit:
