

SKULL

protective case for the brain, smell, hearing, and vision. The upper or superior end of the skull is divided into two main parts: the cranial bones. The base of the skull is larger than the sides and top of the skull. The base of the skull encloses the front of the brain, blood vessels, and tubes for the eyes and the ears. The jawbone is the largest bone in the skull.

- 
- A human skeleton is visible on the left side of the slide, with the skull and upper torso clearly shown. In the background, there is a faint medical diagram of the human head and neck, showing the jawbone, teeth, and surrounding structures. The diagram includes labels such as "membrane", "for the eyes and", and "or jawbone".
