## **Hawaii is the only state of the United States that:**

- is not geographically located in North America
- grows coffee
- is completely surrounded by water
- is totally an archipelago
- has a royal palace
- does not have a straight line in its state boundary

- Hawaii's tallest mountain, Mauna Kea stands at 13,796 ft (4,205 m)

A photograph of a sunset in Kona, Hawaii. The sun is a bright yellow-orange circle on the horizon, partially obscured by the silhouettes of palm trees. The sky is a mix of orange, pink, and purple, with a hazy, pinkish-purple tint across the entire scene, characteristic of vog. The palm trees are dark silhouettes against the colorful sky. The water in the foreground is a deep purple color.

**Sunset in Kona.**  
The colors of the  
sunset are partly  
due to vog

A vibrant tropical sunset scene. The sky is filled with warm, orange and yellow clouds. The sun is low on the horizon, casting a bright glow. Three palm trees are silhouetted against the sky, their fronds spread out. The foreground shows a sandy beach and the ocean with gentle waves. The overall mood is peaceful and tropical.

The climate of Hawaii is typical for  
a tropical area
