Musings on Music

What did people do before the advent of music?

How did they stay calm throughout a long, nerve-wracking day?

How did they relax after a long, hard day at work?

What did they sing to – and what did they dance to – when at play?

Music is a common language spoken round the world;

Music builds a bridge between all peoples and all lands;

Music is the link which holds us close together;

Music is the bond of love in which we all clasp hands.

What did people do before the advent of music?

Answer the questions

What type of music do you like?

What type of music don' t you like?

Who are your favourite musicians?

Do you ever buy cassettes or CDs?

How has your taste in music changed?

What is it?

A (very short) history of rock music

A (very short) history of

Rock music in one form or another is now the most popular type of music all over the world. But where did it come from?

BLACK MUSIC

Rock began in the USA in the early 1950s. At that time, 'rhythm and blues' music was very popular with black Americans. 'R & B' was a mixture of black religious music ('gospel') and jazz. It had strong rhythms that you could dance to and simple, fast lyrics.

ROCK 'N' ROLL

Noticing the success of R & B music, white musicians started to copy the same style. By the mid 1950s, this new white R & B music, called 'rock 'n' roll', had become very popular. Singers like Elvis Presley and Bill Haley attracted millions of teenage fans. Their music was fast and loud. Many older people thought that rock 'n' roll was very dangerous.

By the early 1960s, even rock 'n' roll had become old-fashioned. Many of the songs had begun to sound the same. It was at that time that a new group from England became popular: The Beatles.

ROCK MUSIC

THE BEATLES

The Beatles first started by singing American style songs, but they soon developed their own style, with more complicated melodies. They also introduced different instruments, such as the Indian sitar. Groups like The Beatles had a very important influence on the style of popular music. By the early 1970s, rock 'n' roll had developed into a new form of music. Electronics had replaced the amplified guitars and drums of rock 'n' roll. 'Rock' had arrived.

ROCK TODAY

Rock music has continued to change and develop. It has combined with music from different parts of the world. Today, there are hundreds of different types of rock music, and almost every country has its own form of rock. There is 'heavy metal' which is extremely loud with hard rhythms, 'reggae', from Jamaica, that combines rock with jazz and Latin rhythms, 'rap' that developed on the streets of New York, 'disco' a type of soft rock music for dancing, 'Afro-rock' that combines rock with African rhythms, 'Mex-rock', which combines rock with traditional Mexican melodies ... and many, many more.

What does the text say about?

The early 1950s

The mid 1950s

The early 1960s
