У нас в народе, есть поговорка «Попал в тупик», т.е. попал в такое положение, откуда нет выхода. У немцев аналогичная поговорка гласит: «Попал в дробь». Она означает, что человек, попавший в дробь, попал в трудное положение. Эта поговорка напоминает о тех временах, когда дроби считали самым трудным, запутанным разделом математики, т.к. общих приёмов действий с дробями и записи дробей не было. Мы начинаем изучать их уже в младших классах. Задача нашего урока-показать что дроби не смогут поставить нас в трудное положение. Будем уверенно складывать и вычитать их.
