The background features a grayscale image of interlocking gears of various sizes, some in sharp focus and others blurred. In the lower right corner, a portion of a technical drawing grid is visible, showing a series of intersecting lines forming a square pattern.

*My profession -*  
*design engineer*

- 
- The background of the slide features a grayscale image of interlocking gears on the left and a technical drawing or blueprint on the right, both rendered in a light, semi-transparent style.
- ***Design engineer is a developer of new constructions. Design engineer is a expert who creates something new on the basis of their knowledge.***
  - ***Design Engineer working in factories in the construction department.***

- ***Design engineer a very broad concept and its meaning depends on the specialization. My specialization - hydraulic and pneumatic machines. Design engineer whose specialty is mainly engaged in hydraulic pump design.***

# **The basic requirements for an engineer :**

- ***Necessary knowledge and their constant updating***
- ***Engineer must be organized***
- ***Engineer must be responsible***
- ***Engineer must be able to apply their skills in theory in practice***

- 
- ***Unfortunately engineers earn a little money, but it's not a problem specialty. This is due to the poor economic situation in our country. In developed countries, engineers earn a lot of money. Since mental work appreciated worldwide.***

## **Good points engineer jobs:**

- ***Interesting object of work.***
- ***This work is very creative and interesting, requires constant self-improvement.***
- ***Engineer every day learn something new, to create something new.***

## **Bad points engineer jobs:**

- ***Engineer to go to great responsibility for his work. Engineer must be responsible for their mistakes, including financially.***

# Prominent professional

- *Denis Papen French mathematician, physicist, inventor and engineer.*
- *He invented the first centrifugal pump.*
- *At the University of Angers, he studied medicine and received his doctorate.*
- *Papen also proposed the construction of a centrifugal pump, designed for glass melting furnace, a steam wagon and a submarine, invented the pressure cooker and a few machines for lifting water.*

***Thank you for listening!***  
***Cood bye!***
