Plan

- How to slake a planet's thirst
- The world's forgotten crisis
- Atlas of a thirsty planet
- Agricultural crisis
- Saving water resources

People lack drinking water and sanitation

Planet's thirst

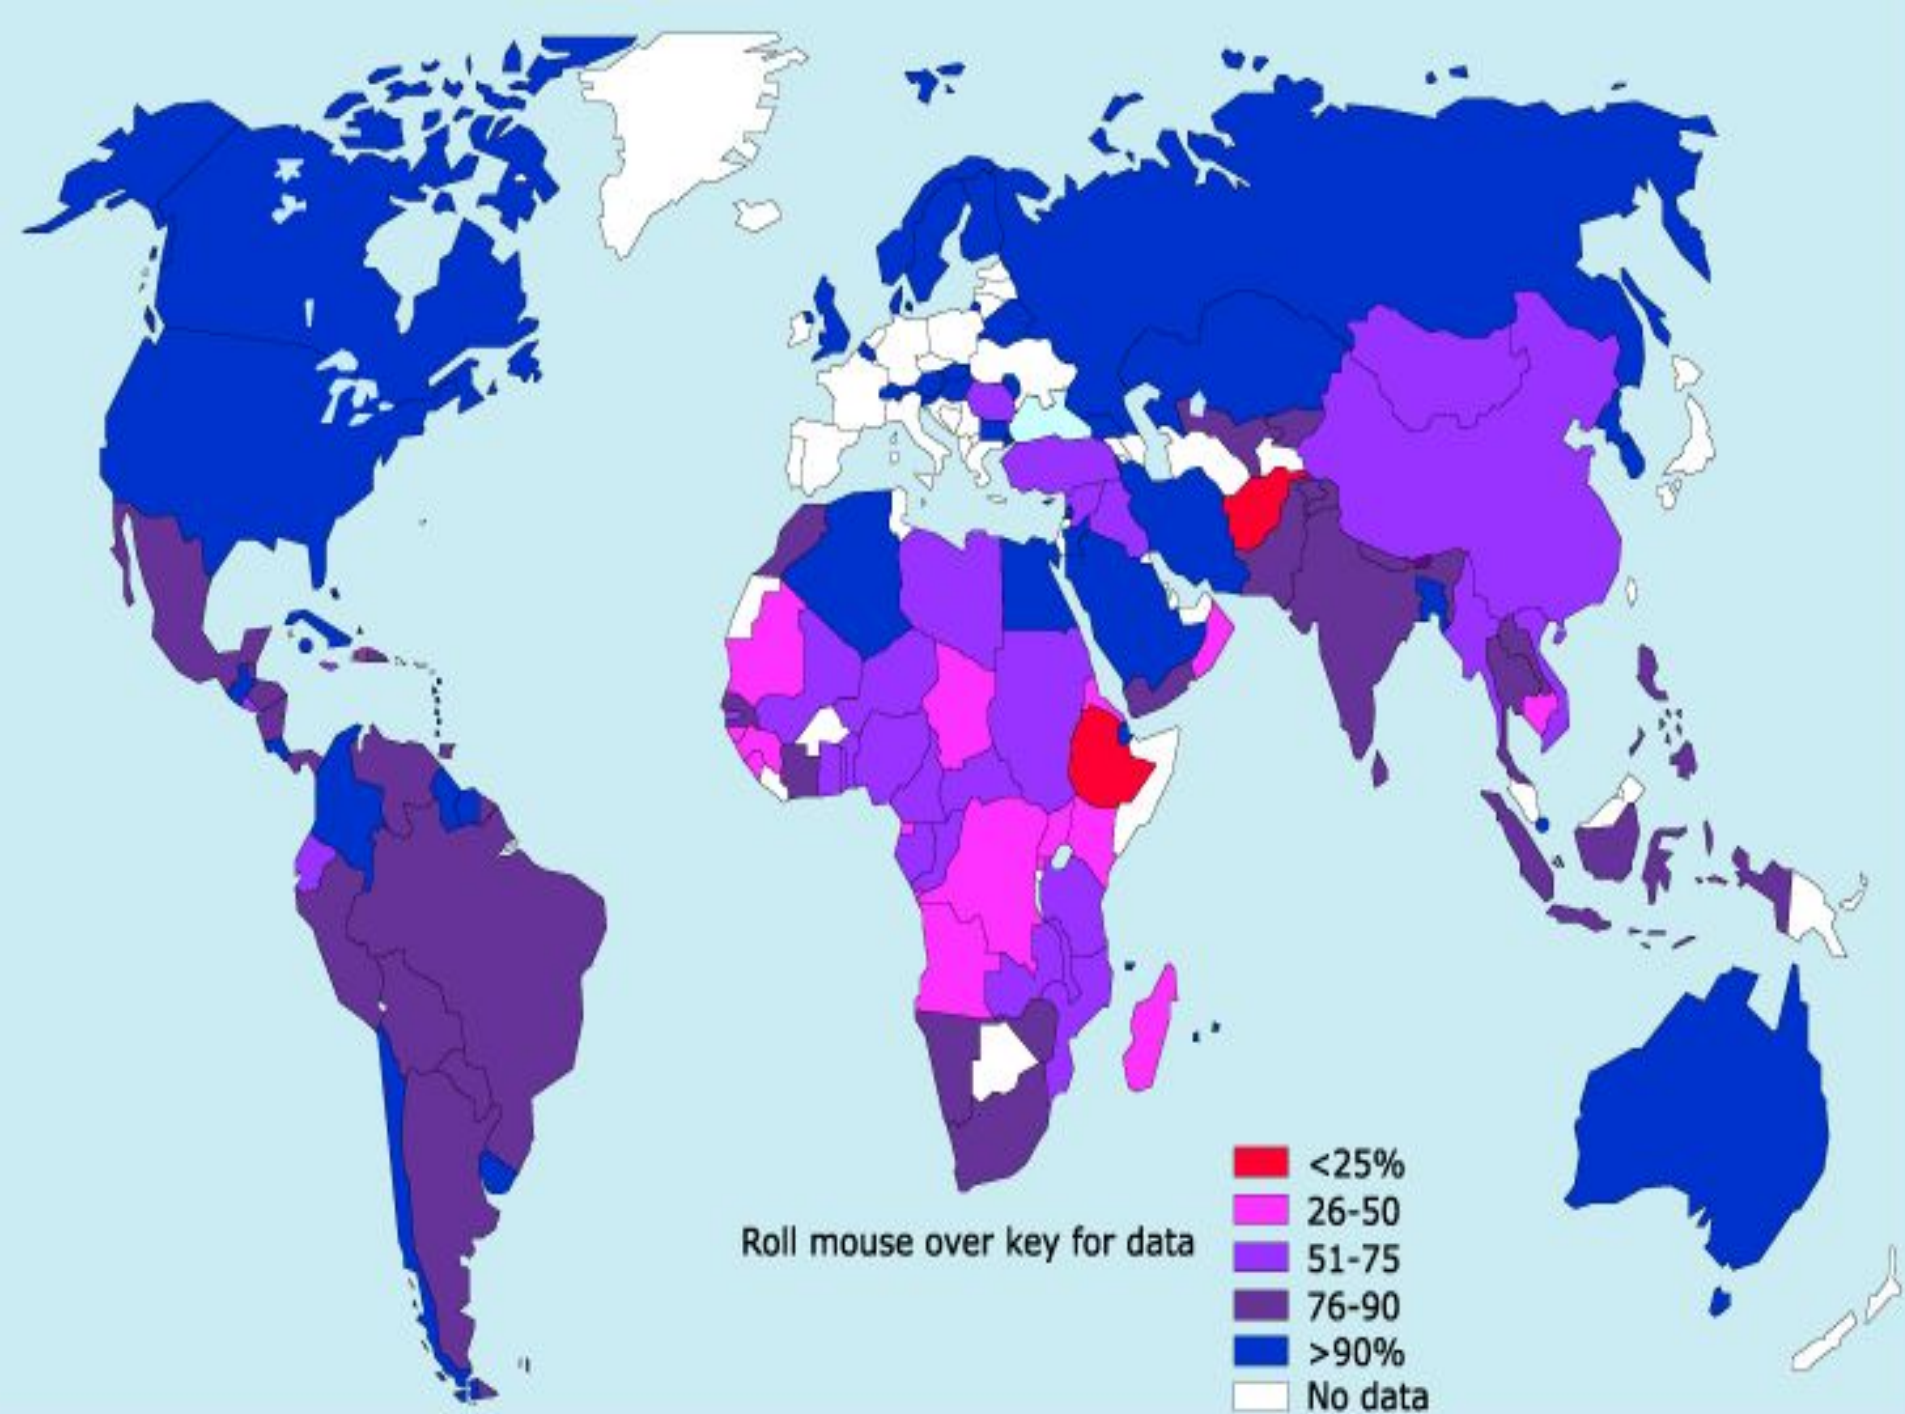

**About 2 million people will
have died before their time.**

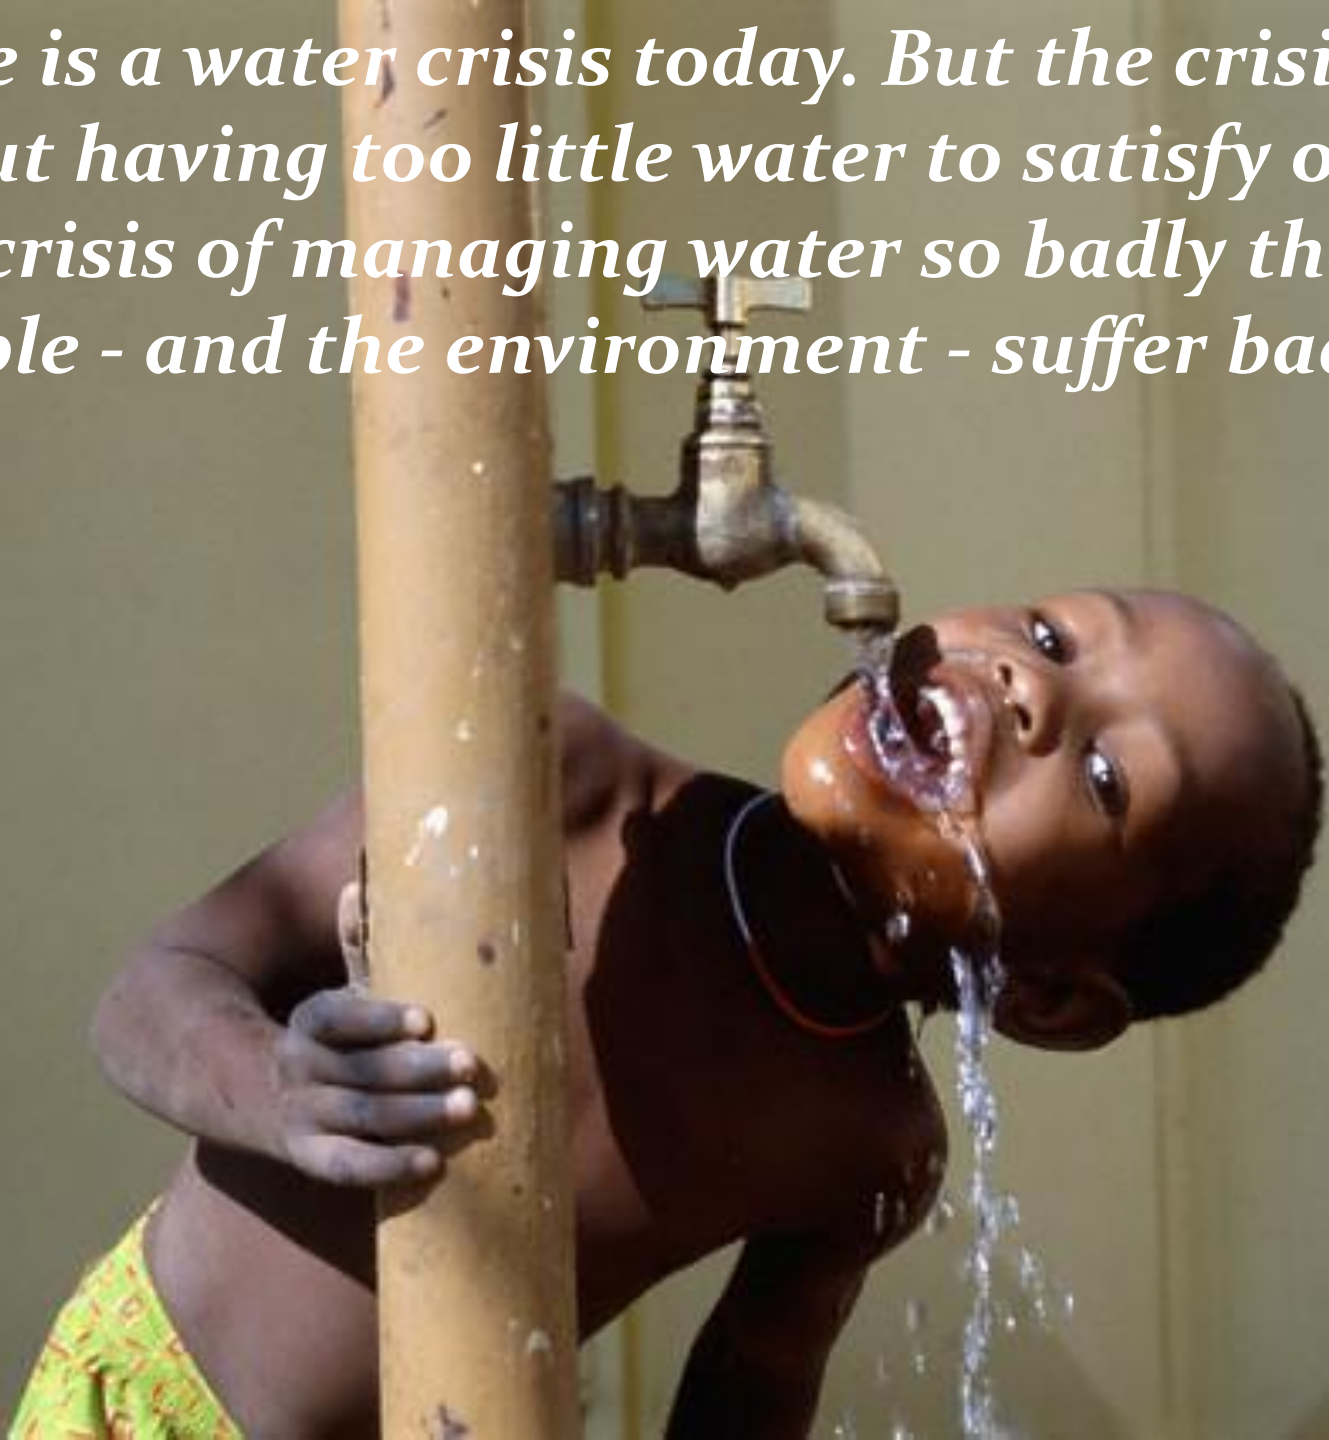

**Over a billion people cannot get clean water,
and things are getting worse.**

Water resources are becoming scarce

"There is a water crisis today. But the crisis is not about having too little water to satisfy our needs is a crisis of managing water so badly that billions of people - and the environment - suffer badly."

Let`s save our planet and future!
