

**Computers are
necessary part of
modern life**

On the one side...

Life is simple

- Computers help us in usual things, like planning our routes.

Life is fast

- Computers help us to do more in less time.

Life is joint

- Portable computers help us get together with friends even if they are far from you.

Life is safe

- Computers help us to protect our health.
- Computers help us to protect our property.

On the other side...

Computers are replacement of reality

- Computers made us to forget about real games, real communication. People sit behind monitors making virtual farms instead of visiting countryside and making a real one.

Life is depended of computers

- Virtual games make us more cruel and aggressive.

Computers are dangerous for teens

- Young generation is influenced by computers in most way. Content of many sites can affect their mind.

Computers are reason of low birthrate

Women prefer to make perfect virtual family instead of trying to make her best.

Make love, not virtuality.

Conclusion

- We should keep a balance between reality and virtual world.
