# First News Papers

THURSDAY, MAY 14. 1761.] **THE BOSTON NEWS-LETTER.** No. 2967

Printed by J. Draper.

By Capt. Malloy, who is arrived at Philadelphia from Liverpool, and Capt. Lavin, who is arrived at New York, formerly from France, in 7 Weeks, and by Capt. Kings, who is arrived from London, we have the following Intelligence.

**LONDON, Jan. 27.**  
MADRID, Jan. 27.

Whoever desires the King might be to employ his mediation for reconciling the Powers at War, that matter is now deep. On the contrary, reputation being made to the Courts of Vienna and Italy, and the interests received not being equal, his Majesty has taken resolution to see the means which God hath put into his hands, to settle their mutual kindness, either amicably or by compulsion. In consequence of which, it is not doubted out a war will be kindled in Italy which will cost much blood.

The Spaniards see with pain the many favours granted to Italians; and cabals are forming — It is given out that the King takes no pleasure in Spain; and in order to get back into Italy, wants to place Don Lewis on the Spanish throne; and to receive himself deposed in the greatest part of Italy and deprive the Duke of Parma of most of his claims. It is added, that the Courts of London and Vienna have already resolved, to know how far they are disposed to a defensive treaty, which the King may be able to execute. This of Vienna, and Versailles, if they should still persist in the favour they give, will cost much blood.

From the LONDON GAZETTE.  
WESTMINSTER, March 3, 1761.  
His Majesty gave the following message to the public and to his privy counsellors. After which His Majesty was pleased to make the following most gracious Speech.

My Lords and Gentlemen,  
UNION granting, and thereby binds the joint, the greater ease of their own will naturally a sure consideration.

In consequence of the Act passed in the reign of my late gracious predecessor King William the third, for settling the succession to the crown in my family, their obligations have been made during their good behaviour; but notwithstanding that the provision of their offices has been discontinued upon the death of the crown, or at the expiration of 6 months afterwards, in every instance of that nature which has happened, I look upon the independence, and impartiality of the judges of the law, as essential to the impartial administration of justice, as one of the best securities to the rights and liberties of my loving subjects, and as most conducive to the honour of the crown; and I am come now to recommend this interesting object to the consideration of parliament, in order that such further provision may be made for securing the judges in the enjoyment of their offices, during their good behaviour, notwithstanding any such demise, as shall be most expedient.

Members of the House of Commons,  
I shall desire of you in particular, that I may be enabled to grant and establish upon the judges such favors as I shall think proper, so as to be absolutely secured to them during the continuance of their commission.

My Lords and Gentlemen,  
I have nothing to add, but my thanks for the great unanimity and application, with which you have carried on the public business, and to desire you to proceed with the same good disposition, and with such efficacy that this session may be soon brought to a happy conclusion.

Paris, January 26. Marshal Duke of Belleisle died yesterday at Versailles, aged 75 years. He was Knight of the order of the Holy Ghost, and that of the Golden Fleece; a Prince of the Empire, and Governor of the three bishoprics of Metz, Toul, and Verdun. His body is to be interred at the abbey Church of St. Denis, the burial place of the royal Family.

Convois are frequently held on the dispatches received from abroad, and are thought to be relative to a peace; and as several neutral powers seem to do to sit about that work in concert, we begin to hope it may be accomplished; if not, the war will rage with greater fury, & some arrangements, especially concerning Italy, will greatly embarrass thereto. — We already see preparations which bear no doubt of the success of the next campaign. The enemy, on their part, do not seem to be idle. The English talk of sending a reinforcement of footmen or horse thousand men into Germany.

**HAMBURG, January 27.** The Duke of Mecklenburg who had lately retired to Labock, is returned to Schwerin, the chief place of his residence, after having agreed with the Prussians with regard to the contribution they had required, which have been reduced to 15,000,000 rixdollars, one third of which, it is said, he has agreed to pay himself, the rest by the collection of the inhabitants of the country.

**WESTMINSTER, February 27.**  
On the 29th the enemy advanced Hilsfeldt, and fired fire to the magazine, our troops entered the next day, and forced 60,000 loads of meat, 10,000 of oats, and a million rations of hay. The French troops which were at that place in the night, and much to the wards fields, were 15 battalions.

All the artillery and baggage of the five Saxons battalions made prisoners by General Sporken, likewise fell into his hands.  
On the 19th, New came from M. de Sporken (by Captain de Bouch, his aide-de-camp) 1 — That M. de Luckner attacked the 12th, the French and Swiss Grenadiers, who had passed the night under the Atlas, in the Wood of Thone, — some positions advanced Fuchs at Arnold and Sackevitz. He pushed they gained a thick Wood, which Count de Solms had furnished by felled Trees. They demanded each other. The Enemy received 6000 rixdollars from the Quarters on the Weira; and that of the Saxons.

The Night coming on, M. de Sporken could not assemble his Men, so as to undertake any thing against the Enemy, he contented himself with making Fuchs and the Puffs farther on. The Numbers of this Day confirm the story which was expected. The Loss of the Enemy was more considerable, and four Officers and 1200 of their Men were taken.

On the 20th, the Prussians had the Height of Langefeldt, which was occupied by 12000 Men. M. de Sporken's Camps on the left side of the River Ulfers, with the 7 Camps at near as a point.  
He agreed with M. de Sloburg, that the Prussian Troops should pass the night at Merzleben, whilst he passed it at Thonshofen, and M. de Luckner at Hilsfeldt. In the Night the Bridges, which the Enemy had broken, were repaired.

The Prussian Cavalry got through the Passage of Merzledel, whilst their Cannon was battering the Town of Langefeldt. Eight Squadrons of M. de Sporken's Bill Linc passed at Thonshofen with a whole whole Company could not pass, the Water cutting out on all the Day. In the mean Time the Prussian Cavalry got into the Enemy, who were going out of Langefeldt; and M. de Sporken's Camps did to likewise upon the Troops which were coming down the Hill.  
M. de Sporken compares the Enemy's Loss that Day at 9000 Men, at the same Time that his own Cavalry exceeds 2000. Later, Gen. Heidenberg was wounded and taken Prisoner.

The Prussian took 3 Battalions, and 7 Pieces of Cannon; and M. de Sporken's Troops took two Battalions and six Pieces of Cannon.  
L O N D O N, January 31.  
His Majesty's Affairs are at present in excellent order; his army is very numerous; he has forced peace with us; and has preparing for war; and the public will receive the most authentic proofs of the veracity of these assertions from only operations, which may probably decide the fate of the campaign almost as soon as it begins.

On the 29th the enemy advanced Hilsfeldt, and fired fire to the magazine, our troops entered the next day, and forced 60,000 loads of meat, 10,000 of oats, and a million rations of hay. The French troops which were at that place in the night, and much to the wards fields, were 15 battalions.

All the artillery and baggage of the five Saxons battalions made prisoners by General Sporken, likewise fell into his hands.  
On the 19th, New came from M. de Sporken (by Captain de Bouch, his aide-de-camp) 1 — That M. de Luckner attacked the 12th, the French and Swiss Grenadiers, who had passed the night under the Atlas, in the Wood of Thone, — some positions advanced Fuchs at Arnold and Sackevitz. His Majesty's Affairs are at present in excellent order; his army is very numerous; he has forced peace with us; and has preparing for war; and the public will receive the most authentic proofs of the veracity of these assertions from only operations, which may probably decide the fate of the campaign almost as soon as it begins.

A letter from all the Prussian army at Nidewien in Heils, dated Feb. 16, has that G. de Sloburg has gone into the country we winter-quarters than we; and that magazines of forage are already there, a considerable quantity of which is at Fritlar; though that taken accidentally, by the much impetuous Gen. Bienenbach, (who was afterwards killed in an unsuccessful attempt upon Merg) was no considerable one.  
Letters from Hamburg advise, that five Battalions, and five Squadrons of the Prussian troops, are entered into the Service of Great Britain.  
Advers from Spain and Vienna agree, that the Count of Madrid sends upon settlements in Italy, for the Court of Madrid Lewis, and a better Establishment of the Duke Philip, and also upon the Independence of the King of Sardinia's Claim.  
Orders are given for buying up 2000 horses, to remove the cavalry in the allied army in Germany.

To the Author of the New-England Courant.

SIR, [No 2]

STORIES of Lives are seldom entertaining, unless they contain something either admirable or exemplar: And since there is little or nothing of this Nature in my own Adventures, I will not tire your Readers with tedious Particulars of no Consequence, but will briefly, and in as few Words as possible, relate the most material Occurrences of my Life, and according to my Promise, confine all to this Letter.

● New-England Courant

THE [N<sup>o</sup> 80]

## New-England Courant.

From MONDAY February 4. to MONDAY February 11. 1723.

The late Publisher of this Paper, finding so many Inconveniences would arise by his carrying the Manuscripts and publick News to be supervid'd by the Secretary, as to render his carrying it on unprofitable, has intirely dropt the Undertaking. The present Publisher having receiv'd the following Piece, desires the Readers to accept of it as a Preface to what they may hereafter meet with in this Paper.

*Non ego mendaci distulsi Corvinae quinquax,  
Nullo veniente Littra omnia Foro qf.*

ONG has the Prefs groined in bringing forth an hateful, but numerous Brood of Party Pamphlets, malicious Scribbles, and Billigigate Ribaldry. The Rancour and bitterness it has unhappily infused into Mens minds, and to what a Degree it has fowled and leav'd the Tempers of Persons formerly esteem'd some of the most sweet and amiable, is too well known here, to need any further Proof or Representation of the Matter.

No generous and impartial Person then can blame the present Undertaking, which is designed purely for the Diversion and Merriment of the Reader. Pieces of Pleasantry and Mirth have a secret Charm in them to slay the Heats and Tumors of our Epiths, and to make a Man forget his selfe's Inconveniences. They have a strange Power to run the hard Disorders of the Soul, and reduce us to a serene and placid State of Mind.

The main Design of this Weekly Paper will be to entertain the Town with the most comical and diverting Incidents of Humane Life, which in so large a Place as Boston, will not fall of a universal Exemplification: Nor shall we be wanting to fill up these Papers with a grateful Interposition of more serious Morals, which may be drawn from the most ludicrous and odd Parts of Life.

As for the Author, that is the next Question. But the very profits our selves ready to oblige the ingenious and Courteous Reader with most Sorts of Intelligence, yet here we beg a Reserve. Nor will it be of any Manner of Advantage either to them or to the Writers, that their Names should be published; and therefore in this Matter we desire the Favour of you to suffer us to hold out Tongues: Which tho' at this Time of Day it may sound like a very uncommon Request, yet it proceeds from the very Hearts of your Humble Servants.

By this Time the Reader perceives that more than one are engaged in the present Undertaking. Yet is there one Person, an Inhabitant of this Town of Boston, whom we honour as a Doctor in the Chair, or a spiritual Dictator.

The Society had design'd to present the Publick with his Sermons, but that the Linnets, to whom he was presented for a Draught of his Countenance, desisted (and this he is ready to offer upon Oath) Necessitous Features in his Face, more than ever beheld in any Humane Village before, which so raised the Price of his Picture, that our Master himselfe forbid the Extravagance of buying up to it. And then besides, the Linnets outbid a Schick in his Face, which is its it from his forehead in a

first Lie down to his Chin, in such sort, that Mr. Painter protests it is a double Face, and he'll have *Four Penns* for the Portraiture. However, tho' this double Face has spoilt us of a pretty Picture, yet we all rejoiced to see old *Janus* in our Company.

There is no Man in Boston better qualified than old *Janus* for a *Courantier*, or if you please, an *Observer*, being a Man of such remarkable *Opticks*, as to look two ways at once.

As for his Morals, he is a chearly Christian, as the Country Phrase expresses it. A Man of good Temper, courteous Deportment, sound Judgment; a mortal Hater of Nonence, Foppery, Formality, and endless Cessationy.

As for his Club, they aim at no greater Happiness or Honour, than the Publick be made to know, that it is the utmost of their Ambition to attend upon and do all imaginable good Offices to good Old *Janus* the *Courantier*, who is and always will be the Readers humble Servant.

P. S. Gentle Readers, we design never to let a Paper pass without a Latin Motto if we can possibly pick one up, which carries a Charm in it to the Vulgar, and the learned admire the picture of Comedrag. My friends have oblig'd the World with a Greek Strap or two, but the Printer has no Types, and therefore we intreat the candid Reader not to impute the defect to our Ignorance, for our Doctor can lay all the Greek Letters by heart.

*His Majesty's Speech to the Parliament, October 11. tho' already publish'd, may perhaps be new to many of our Country Readers; we shall therefore insert it in this Day's Paper.*

His MAJESTY's most Gracious SPEECH to both Houses of Parliament, on Thursday October 11. 1722.

*My Lords and Gentlemen,*

I Am sorry to find my self oblig'd, at the Opening of this Parliament, to acquaint you, That a dangerous Conspiracy has been for some time form'd, and is still carrying on against my Person and Government, in Favour of a Popish Pretender.

The Discoveries I have made here, the Informations I have received from my Ministers abroad, and the Intelligence I have had from the Powers in Alliance with me, and indeed from most parts of Europe, have given me most ample and current Proofs of this wicked Design.

The Conspirators have, by their Emisaries, made the strongest Influences for Assistance from Foreign Powers, but were disappointed in their Expectations: However, confiding in their Numbers, and not discouraged by their former ill Successes, they resolv'd once more, upon their own strength, to attempt the subversion of my Government.

To this End they provided considerable Sums of Money, engag'd great Numbers of Officers from abroad, secur'd large Quantities of Arms and Ammunition, and thought themselves in such Readiness, that had not the Conspiracy been timely discovered, we should, without doubt, before now have seen the whole Nation, and particularly the City of London, involved in Blood and Confusion.

The Care I have taken has, by the Blessing of God, Eithers prevented the Execution of their trayterous Projects. The Troops have been incomparably this Summer; six Regiments (though very necessary for the Security of this Kingdom) have been brought over from Ireland, The States General have granted me Assistance, that they would keep a constant Body of Forces ready to be employ'd, in the

## How safe is your water?

**A USA TODAY investigation finds:**

- ▶ 58 million people got water last year that violated testing and purity standards.
- ▶ 25 million people got water that had 'significant' violations posing 'serious threats to public health.'

**SPECIAL REPORT: DRINKING WATER'S HIDDEN DANGERS**

## Lax oversight raises tap water risks

A USA TODAY investigation reveals the nation's safe drinking water laws are failing. Even the worst violations have just a 1 in 10 chance of drawing legal action.

By Peter Eisler, Barbara Hansen and Aaron Davis  
USA TODAY

WASHINGTON — When it comes to the nation's drinking water, there's no punishment for pollution.

Each day, millions of Americans turn on their taps and get water that exceeds legal limits for dangerous contaminants. Millions more get water that isn't treated or tested properly, so there's no telling if it's clean. Many people get sick. A few of them die.

And most of the time, nobody does anything about it.

A USA TODAY investigation finds that the federal and state programs charged with enforcing the nation's safe drinking water laws aren't working, undermined by inadequate funding, inaccurate data, a soft regulatory approach and weak political support. Even the worst violations of drinking water laws have just a 1 in 10 chance of drawing legal action by the government.

At the same time, powerful new pollutants imperil the water supply, from hard-to-kill bacteria to industrial and agricultural toxins. Yet water systems increasingly rely on aging pipelines, deficient treatment equipment and poorly trained operators to make the water safe.

USA TODAY did hundreds of interviews and undertook a computer analysis of millions of records from the nation's 170,000 regulated water systems covering 1993-97, from the largest serving 6.6 million people in New York City to tiny operations with just 25 customers, such as Hanks Trading Post in Flagstaff, Ariz.

Next year will be the 25th year that the Safe Drinking Water Act has been law. But the newspaper's investigation found that grave problems diminish its promise:

- ▶ About 40,000 of the 170,000 water systems, serving about 58

### The Other Sides Of Seuss

SoHo has recently become the habitat for some extraordinarily rare species, including the Tufted Gustard, the Two-Horned Drouberhanus, the Blue Green Abelard and the Andulovian Grackler. These odd animals, some liberated from a chicken coop in upstate New York, have hardly ever been glimpsed in Manhattan or, for that matter, anywhere else. And to think that I saw them on Broome Street.

Such wild creatures originated not in some far-flung continent but in the imagination of Theodor Seuss Geisel, better known as Dr. Seuss. Carved in wood, these 1930's sculptures are in "The Art of Dr. Seuss," a show at the Animazing Gallery.

Dr. Seuss the sculptor? This display also features Dr. Seuss the advertising genius, Dr. Seuss the magazine illustrator, Dr. Seuss the political cartoonist and Dr. Seuss the Surrealist, as well as sketches from his beloved children's books. (The Cat in the Hat will greet children at the show tomorrow through Monday, from 11 a.m. to 6 p.m.) Much of the art has never been exhibited before.

"He was a private person and not a very confident man," said Heidi Leigh, the gallery's director. "He knew that with his children's books and in the advertising arena he was

successful. I think he didn't dare to expose himself as a fine artist."

An example of his self-effacement is "Man Who Made an Unwise Purchase," a colorful painting of a Chaplinesque fellow carrying on his shoulder a huge, yellow, unmistakably Seussian bird. "What the painting is about is the 18th publisher, who bought his first book," Ms. Leigh said. That tale, "And to Think That I Saw It on Mulberry Street," had been rejected by 17 others.

But Dr. Seuss was self-assured in his political views. Complementing his ad campaign for bug repellent is a 1942 illustration of Uncle Sam administering "mental insecticide" to a startled man, blasting a "racial prejudice bug" out of the man's ear.

The show even includes a bit of bawdy doggerel and a few nudes. But don't worry: Dr. Seuss's illustrations for his book "The Seven Lady Godivas" are no more anatomically correct than Barbie dolls. But they are much more Rubenesque and have something Mattel's creations don't: a sense of humor.

"The Art of Dr. Seuss," through June at Animazing Gallery, 461 Broome Street, near Greene Street, SoHo, (212) 226-7374. Free.

# Obama: Health care a 'ticking time bomb'

### President lays out his prescription for reform at AMA event in Chicago

By Bruce Vagstad, John Bertone and Susan M. Larkin  
President Barack Obama announced his plan Monday to pass health care reform by the end of the year, calling it "the most important piece of legislation" he has signed since taking office in January. He said the plan would give every American access to affordable health care, and that it would be a "ticking time bomb" if not passed by the end of the year. ## Teen wiz out to show real girls know math

BY MARTIN C. EVANS

erwhere, people who say that women can't do science. "Basically, I think they are all idiots,"

Laverne Summers, Harvard University president, meet 15-year-old Alla Sabur. Sabur, a math wiz and photon physicist from Northport, will be honored by a magazine today as one of "Twenty Teens Who Will Change The World."

In January, Harvard's president said that female differences may make it harder for girls to excel in science. Sabur, who is two years into her doctorate at Philadelphia's Drexel University, is quick to say what she thinks about such views.

"If you listen to people who say things like that, you'll never get anywhere," said Sabur, quoting from homework that involved reading research papers on carbon nanotubes, papers written by Nobel Prize-winning scientists.

"The real issue is a lot of people like that, maybe not quite as high up as him," Sabur countered. "They are pretty much ev-

erwhere, people who say that women can't do science. "Basically, I think they are all idiots,"

Her award will not be a Pulitzer scholarship from Teen People Magazine, which will honor her and 19 other talented young people tomorrow in a ceremony at the Time-Life building in Manhattan.

Sabur jumped straight from fourth grade to Stony Brook University, graduating two years ago. She's working with scientists more than twice her age, exploring ways of trapping single atoms by using laser beams.

Sabur helps her research will lead to improved micro-surgery, using laser acolyte guided by complex that could focus within a few millionths of an inch. She said she finds the work challenging.

"They don't quite hold your hand as much as they do when you're an undergraduate," said Sabur, who began doing her doctoral work at 14, more than

two years before most teens begin applying to colleges. She said she does not feel intimidated by her fellow students, most of them in their 20s and 30s, and none who are married and have children of their own.

"There have been awkward moments, however.

Once, a professor offered to reward his students by taking them out for a drink after completing an exam. When a bartender refused to allow her to sit with her colleagues, she was forced to join her farther from the bar.

Sabur, who left Newport to pursue her studies in Philadelphia, keeps in touch with friends her age by sending messages over the Internet.

Once a week, she returns to New York to practice with the New York Youth Symphony. She will play an orchestral concert when her symphony performs "Tchaikovsky's Symphony No. 4" this Sunday at Carnegie Hall.

Alla Sabur, 15, is two years into a doctoral program.

# National press

- There exist two main groups of newspapers: qualities and populars.

# Content

- Only 2 or 3 newspapers with the largest circulation tell their readers about some rumours or crimes. The main function of press in America is to give objective information. The materials should be given in full volume and newspapers should give floor to all possible facts and opinions. There is also no secret information for the press. The information is usually taken from the News Agencies. The largest and most famous of them are: Associated Press (AP) and United Press International (UPI).

Most general-purpose newspapers are either printed one day a week, or are printed daily. They are in part advertising driven, including classified ads, but also receive income from newsstand sales and subscriptions. Major cities often have alternative weeklies, for example, New York City's *Village Voice* or Los Angeles' *L.A. Weekly*, which are entirely advertising driven, and offered for free to the public. A newspaper meeting particular standards of circulation, including having a subscription or mailing list, is designated as a newspaper of general circulation.

# Archives

# Archives

Many libraries provide microfilm archives of major US papers

The number of daily newspapers in the U.S. has declined over the past half-century, according to *Editor & Publisher*, the trade journal of American newspapers. In particular, the number of evening newspapers has fallen by almost one-half since 1970, while the number of morning editions and Sunday editions has grown.

There also exist about 122 domestic and foreign news bureaus in the USA. There are over 4000 monthly and 1300 weekly magazines in the USA. Among them are: “National Geographic”, “Reader’s Digest”, “Cosmopolitan”, “Time”, “Vogue” and others. Women’s magazines publish all sorts of recipes, stories about local outstanding women, furnishing questions and other items.

- Publishing books in America is rather a prosperous business. America is on the 9th place in the world by the books, published and read. Public libraries always organize book sales. Most newspapers and magazines publish chapters from the books of young authors.

Thank you
