

A. Conan Doyle (1859—1930)

With the words
"Elementary, my dear
Watson ...", the most
famous detective of all
time, Sherlock Holmes,
starts to explain a crime
to his friend, Dr. Watson.
That phrase has now
entered the English
language.

- Sherlock Holmes first appeared in a book called 'Study in Scarlet'. He became famous in 'The Adventures of Sherlock Holmes', first published in the 'Strand Magazine'. After that came a whole series of books about him: 'The Memoirs of Sherlock Holmes', 'The Return of Sherlock Holmes', 'The Hound of the Baskervilles', and many others. Many thousands of the Sherlock Holmes books are still sold every year.

- Who invented Sherlock Holmes? Arthur Conan Doyle was his inventor. Arthur Conan Doyle was born in Scotland, of Irish parents. He was a doctor. In 1882 he moved from Scotland to England, to Southsea near Portsmouth, to set up a practice. One of the doctors he worked for, Dr. Joseph Bell, was the model for Sherlock Holmes's friend, Dr. Watson. Conan Doyle's medical knowledge was a great help to him in his detective stories.

- Conan Doyle started the fashion of the detective story. Today the fashion goes on — with Simenon's Inspector Maigret stories and the stories of other writers.
- And what sort of man is Sherlock Holmes? We learn a lot about him from the stories in which he appears. He has a thin face and intelligent eyes. He speaks when he has something to say. He smokes a pipe (he has a collection of them). He plays the violin. He lives at 221 'B' Baker Street in London.

- If you go to London, you will not be able to find 221 'B' Baker Street. But instead, you can go to a pub called "The Sherlock Holmes" in Northumberland Street (near Trafalgar Square). In that pub there is a room like Sherlock Holmes's room at 221 'B' Baker Street, as described in Conan Doyle's stories. There is also the stuffed head of a hound. It is said to be the original 'hound of the Baskervilles'!
- Sherlock Holmes after more than eighty years is still the most famous detective in the world.

- Sir Arthur Conan Doyle, the novelist, first created his famous character, Sherlock Holmes, in 1885. Six years later, when he wrote another group of stories about the detective, Sherlock Holmes was a name that everybody knew.

- When Conan Doyle began to get tired of writing detective stories, he decided to 'kill' Holmes. He wrote a story in which Holmes meets his great enemy, Professor Moriarty, in Switzerland. Holmes and Moriarty fight, and fall over a cliff and are both killed. The public didn't like it. Conan Doyle had to write another story in which Holmes comes back.
- Conan Doyle was a famous writer. He became popular because of his love for people.

- Sherlock Holmes and Dr. Watson go on a camping trip, set up their tent, and fall asleep. Some hours later, Holmes wakes his faithful friend.
- - Watson, look up at the sky and tell me what you see.
- Watson replies, - I see millions of stars.
- - What does that tell you?
- Watson ponders for a minute.
- - Astronomically speaking, it tells me that there are millions of galaxies and potentially billions of planets. Astrologically, it tells me that Saturn is in Leo. Timewise, it appears to be approximately a quarter past three. Theologically, it's evident the Lord is all-powerful and we are small and insignificant. Meteorologically, it seems we will have a beautiful day tomorrow. What does it tell you?
- Holmes is silent for a moment, then speaks.
- - Watson, you're idiot, someone has stolen our tent.

Sherlock Holmes and his friend Watson were on a camping and hiking trip.

They had gone to bed and were lying there looking up at the sky. Holmes said, "Watson, look up. What do you see?"

"Well, I see thousands of stars."

"And what does that mean to you?"

"Well, I guess it means we will have another nice day tomorrow. What does it mean to you, Holmes?"

"To me, it means someone has stolen our tent."
