- ❖ Ideal school;
- ❖ About myself;
- ❖ Uniform in school;
- ❖ My essayMy essayMy essay on a theme of education:

My perfect school!

My school

Understand students' problems.

Talk freely to teachers.

Have no boring and useless subjects.

Be strict and have discipline.

Prepare for real life.

Back...

A bit about my school:

I like my school. It is very comfortable and cozy.

In it always merrily.

All the students are busy as ants and nobody walks at a loose end.

A home atmosphere reigns in it.

A lot of flowers in it.

It is very light!

Kind, careful and clever teachers create school atmosphere.

Merry, hardworking and creative students live there.

As for students and teachers they have a friendly relation and mutual aid.

Their attitude to each other is resection.

All offered subjects for students accepted with interest.

An Ideal School...

The school I would like would be cozy, light and comfortable. The classrooms would have carpets instead of linoleum and the chairs would have cushions. The playgrounds would be separate, one for the young children and the other for the senior forms. A wall would be separating them and there would be a door from one playground to the other.

Next

...Nex

An ideal school...

There would be three floors at the school. There would be a lift to take us up. The school meals would have different food every day. There would be a concert's hall and a lot of visitors coming for listening concerts. And there are parks for teens activities. The hall would be

about 60 meters long and wide

About myself

My name is Helena. My surname is Gilyova. I am 14 years old. I am not tall. I have fair hair, blue eyes. I am sociable, responsible and industrious.

I live in Russia. I was born in Pripolarny-settlement. My hobby is music. I like to listen music, dancing, walking with my friends. I study in the 8-th form. My favorite subjects at school are English, Science (Physics) and Mathematics.

Back...

Uniform in schools

I hate wearing school uniform. I think students should be allowed to wear what they like, it doesn't matter if it is a state or a private school.

Must students feel fed up with school uniform because they not feel comfortable in it. Students can't think about lessons, when they feel not free. Students should wear the clothes they feel comfortable in. For boys can be sportive style, because they feel comfortable in it. It is very free and boys feel a free.

And for girls-uniform must be comfortable and nice. But uniform mustn't be bright very much

Back...

My essay by the theme of education.

Education is a process and result of mastering of the systematized knowledge, skills. During education there is a transfer from generation to generation of knowledge of all those spiritual riches which were developed with mankind, mastering of results of the socio-historical knowledge reflected in sciences about a nature, a society, in engineering and art, and also mastering by labor skills and skills.
