

Multi-media book

What does it look like?

- These is our new invention Multi-media book. It looks like a usual net book and has something in common with a usual electronic book.

Description

- All of us like reading books but everyone imagines main heroes differently. And we are very happy to present you our new invention. It can show films with heroes you imagine on 3D. It weighs over 200 g. Also it works from electricity.

How does it work? What is it made from?

How to use? And advantages of it.

- It has a panel with buttons. If you push it, a menu appears there and you can choose necessary variants: reading or watching a film. It's metal with plastic parts.
- Very easy to use, easy to carry, enjoyable and reliable, too.

How much does it cost? Where can you get it?

- It costs over \$300 and you can get it on our site www.futurebooks.com and in our special shops. Their address can be found on our site.
