My favourite animals

There are a lot of animals on our planet. They can be wild and domestic. I want to speak about my favourite animals.

Dolphins

Dolphins are wild animals. They live in oceans and seas. Dolphins have long tails and long noses. They are grey. Dolphins are very clever and very kind. They can swim very well. Dolphins like to eat fish.

Leopards

Leopards are wild animals. They live in Africa. They have got their own territory to live in.

Leopards have sharp teeth, long tails and small ears. They are yellow and have black spots. They are strong and very clever.

Leopards hunt different animals in the long grass.

Cats are domestic animals. They live with people. Because people always call cats «pets».

They are kind, clever and very funny. They have sharp teeth and four paws with sharp claws. They like to eat fish, meat, milk. They can run and jump very well. Cats are like doctors.

Cats

My Pet

I have got a cat. Its name is Barsik. It's grey. I teach my cat a lot of things: to answer to its name, to understand the word "No", to play with a little ball and to play hide-and-seek with me.

Barsik learns all these things very quickly as it is a clever cat and I am a good teacher. We are good friends and Barsik is the best animal for me.

So my favourite animals are dolphins, leopards and cats.
