

# The Pleasure of Reading.

# Printing.

- The invention of printing played a huge role in the socio-political and historical and cultural life.

# Furthermore...

- Of great importance to the invention of printing betrayed by scientists from different eras.

In Russia, the printing press began in the middle of the XVI century, while in Europe it firmly established as early as 40-50 years of XV century.

# *inventor.*

*The inventor  
invented the  
printing press, in  
which was based  
on  
construction of  
the press, being  
applied in  
winemaking and  
the production of  
paper*

# first machines.

- Europe xylographic book appeared after the Crusades. Her contributed to the emergence and flourishing of the massive demand for paper money and playing cards. Separate sheets stick together, first in the form of tape, later collected in a book. Printers sometimes had to cut out the board elements images of characters to replace them with others.

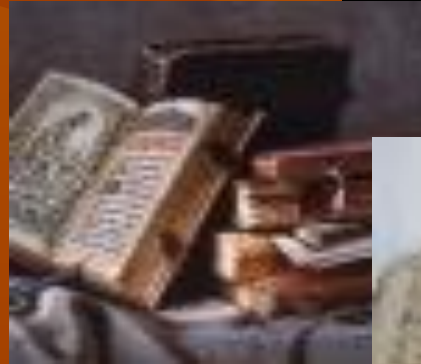

**remember.....**

- Have you seen the church books, training, and later appeared adults and children's writer, appeared idols.

and we go during our childhood idols and favourite writers.
