Решите задачу

Высота одной стены терема равна трём косым саженьям.

За покраску одной косой сажени берут 2 рубля.

Сколько денег надо заплатить за покраску 4 стен терема?

Дщерь ли имаша: положи на них грозу свою, соблюдеши я от телесных: да не посрамиши лица своего, да в послушании ходит, аще бо отдаси дщерь свою без порока, то яко велико дело совершиши и посреди собора похвалишися, при концы не постонеси на ню».

При Николае II сохранились все типы школ. В церковно-приходских школах изучали: Закон Божий, арифметику и грамоту. Число высших учебных заведений резко сократилось. Правительство уделяло внимание развитию науки. Крупнейшие предприниматели России вкладывали деньги в развитие зарубежной науки.
