

The background is a dark, heavily textured metal surface, possibly a control panel or a piece of machinery. It features several mechanical components: a circular lens or light fixture at the top center, two vertical assemblies with handles on the right side, two vertical cylindrical components in the lower middle, and two vertical assemblies with handles on the left side. There are also several small circular ports and a row of four small knobs at the bottom. Handwritten markings in white or light-colored ink are scattered across the surface, including "MA 10" at the top right, "E" in the upper middle, "30 x 3,5 x 12" in the middle left, "mm" at the bottom left, and "То.Нрр" at the bottom center. The overall appearance is that of an old, industrial or military-grade device.
