

# Ecological problems in our country

# The aims of our lesson are:

- To brush up the words connected with the theme
- To discuss the topics which are the part of our theme
- To find out how other people protect the environment and wildlife
- To understand how important it is for us to save the Earth
- To think of the ways you can protect the environment

cluster

# Thick and thin questions

- : Do you believe that our environment is in danger?
- Do you agree that our nature is dangerously polluted?
- Do you agree that because of land, air, and water pollution our plants and animals are dying?
- Why do you think our environment is polluted?
- What happens in our country?
- What ecological problems are the most important for you? Why?
- Do you find that pollution is a very serious problem nowadays?
- Why can't fish live in rivers?
- Why are the birds, animals and the wildlife in danger?
- Do you think our planet needs protection?
- What is the current situation with the forests?

- Many animals are disappearing nowadays. People cut down trees and many animals lose their homes.

- Plants and factories send smoke into the atmosphere. The results are changing of climate and global warming.

- We have a problem with dirty air too. People can't breathe in big cities because the air isn't fresh.

- Water is very important for us and without drinkable water we'll die. Different plants make water dirty. People can't drink this water and animals die in this water.

- People leave rubbish at the seaside too. It is also very bad.

- The result is very sad.

Now I want you to express your opinion to the question “How to be friendly to the environment?” What does it mean? Organize a role play according to the technology “RAFT” (“Role, Audience, Form, Topic”). Divide into groups and choose roles. (scientists, ecologists, volunteers)

- Role Card 1
- You are a scientist/ You are making a report at the international conference. Use the following ideas to support your report/
- Role Card 2
- You are an ecologist. You research different ecological problems in our region. /You are asked to describe the situation for the children at school/
- Role Card 3
- You are a group of young volunteers. You are discussing problems of our polluted environment at the meeting

We live in a small world too. It's very important to protect our nature where we live. It needs our help. The presentation about our settlement. What can you personally do to save our environment?

# Our plant

The palace

Our school

The beautiful river Kama

Our church

# Our beautiful nature

# Useful tips

- Don't break trees.
- Don't leave litter.
- Keep the town tidy.
- Respect the life and work of the countryside.
- Put litter away.
- Grow trees and flowers.
- Don't frighten birds and animals.
- Don't cut wild flowers.
- Don't burn fires.
- Don't hurt animals
- Feed birds and help them
- Plant trees and flowers
- Clean rivers
- Always put garbage in a garbage bin. Don't cut down baby trees
- Don't paint on the trees

**The result**

- The famous English writer John Galsworthy said: "If you don't think about the future you will not have it."
- Let's think about the future. Let's keep our planet tidy and make it a better place to live in. Let's save the Earth for ourselves and it's important to save all forms of life.
