

WE LOVE YOU,

DEAR ANIMALS!

About penguins

- Penguins are marine birds but they can't fly. They live on islands in sub-antarctic waters. Penguins usually get together in large colonies. All penguins are excellent swimmers and divers. They spend many days in the open sea to search for food. They eat fish. They are not afraid of snow and often rest on icy places.

- The little blue penguin is about 35 cm in the height and about 1 kg in weight and the amber penguin is to 115 cm and 25 to 40 kg. Most penguins are black on the back and white below.

About tigers

- Tigers live in Asia. They are strong and clever. They sleep during the day and hunt at night. Tigers eat small and big animals. They are good hunters. A big tiger can eat 50 kg meat in one night. Tigers normally have two or four babies. They are called cubs. Cubs live with their mother until they are three years old.

About monkeys

- The chimpanzee
- They say it is the most intelligent animal. Dr. Blair from the New-York Zoological Park watched Ellen, his female chimpanzee to put on a sweater. She could sit at the table, eat food with a fork like any other eight-year-old.
