

Dashkov Danil, 3a

The brown bear likes to make its home in a tree

- The bear lives in the forest
- It is a big animal
- It is very strong

 It likes to eat forest berries, honey, fish, small birds and animals too.

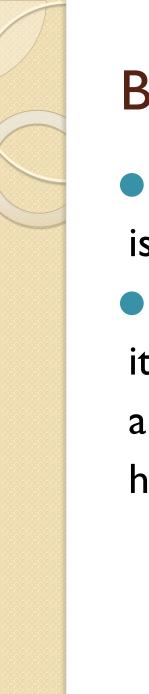

In winter the brown bear can`t see any

food in the forest

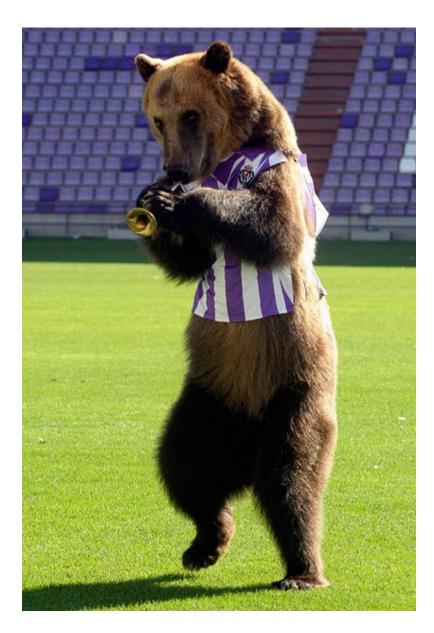

So it goes to sleep

- When it gets warm, the bear gets up and walks about the forest
- It is very hungry and angry

The brown bear is very smart.
People can teach it to dance, to ride a bike and to play hockey.

Thank you for your attention!
