

*Тема урока:*  
*«The Environment Protection»*  
*(Защита окружающей среды)*

*If you don't think about the future,  
you will not have it"*

*(Если ты не подумаешь о будущем,  
у тебя его может не быть)*

*John Galsworthy*

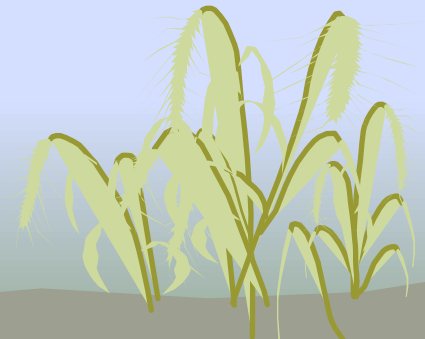

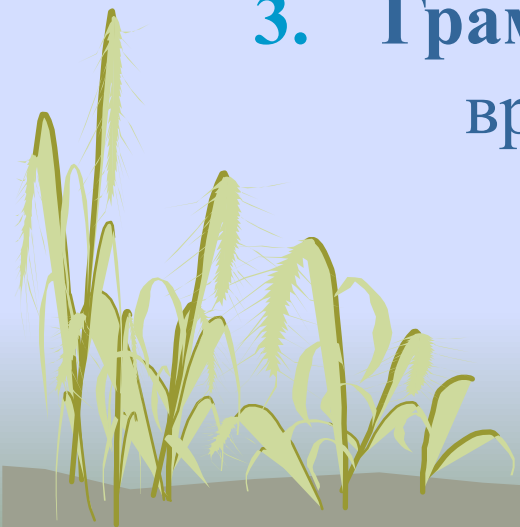

# *Цели урока:*

- 1. Общеобразовательный аспект** – обучение чтению и говорению.
- 2. Воспитательный аспект** – духовно-нравственное воспитание: воспитание бережного отношения к родной Земле, любви к природе.
- 3. Развивающий аспект** – развитие логического мышления, способностей к сравнению, умозаключению.

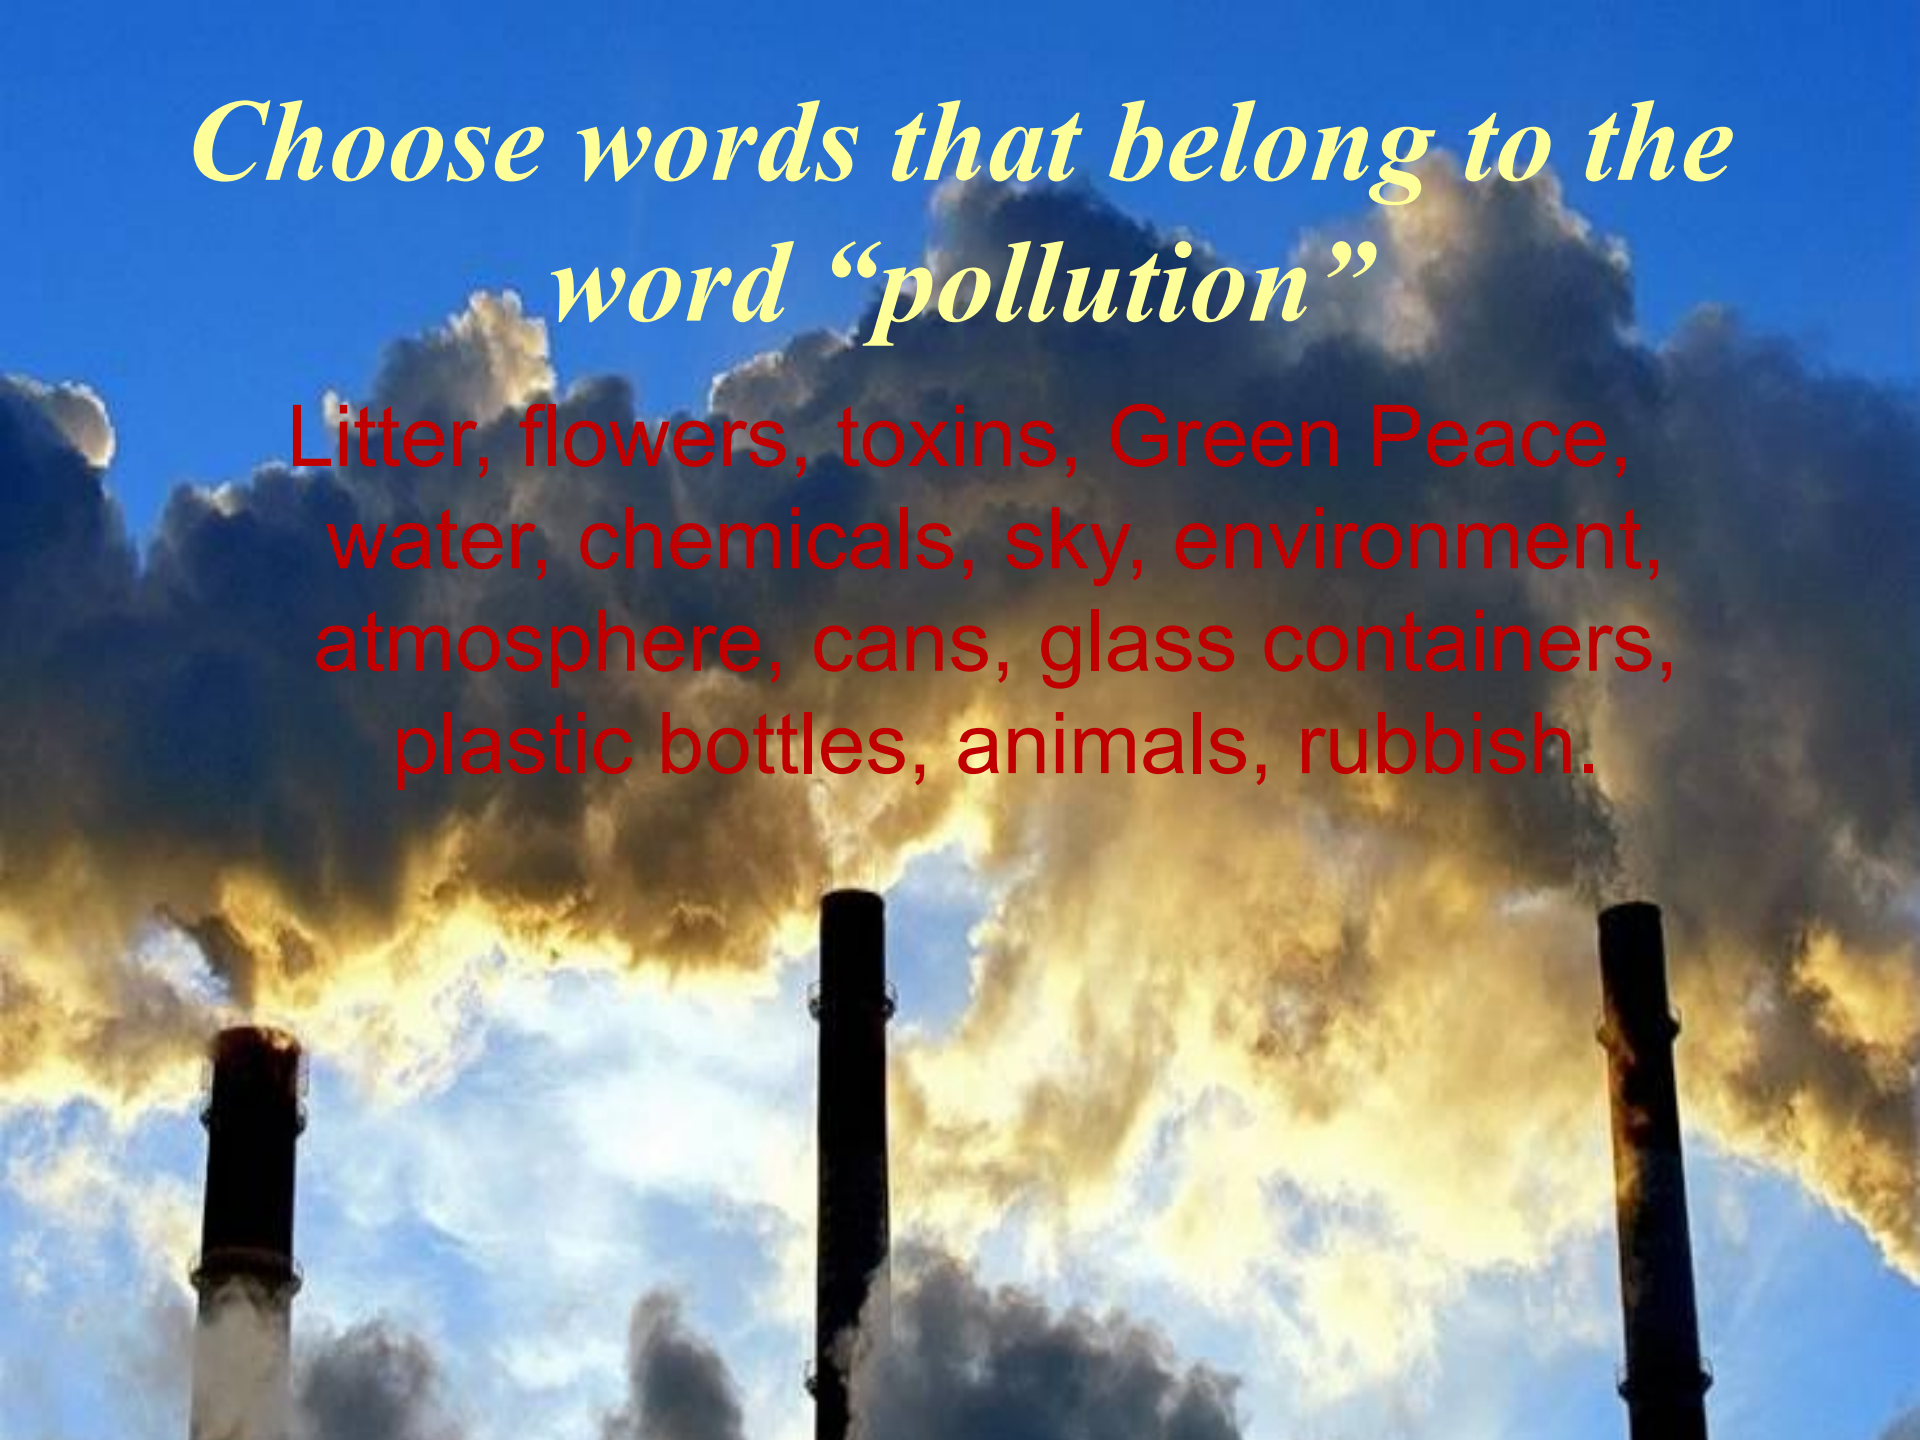

# *Задачи урока:*

- 1. Фонетика** – отработка трудно произносимых слов по данной теме.
- 2. Лексика** – закрепление активной лексики в новых речевых ситуациях, введение новых лексических единиц.
- 3. Грамматика** – закрепление английских времен, модального глагола «can».

*Choose words that belong to the  
word “pollution”*

Litter, flowers, toxins, Green Peace,  
water, chemicals, sky, environment,  
atmosphere, cans, glass containers,  
plastic bottles, animals, rubbish.

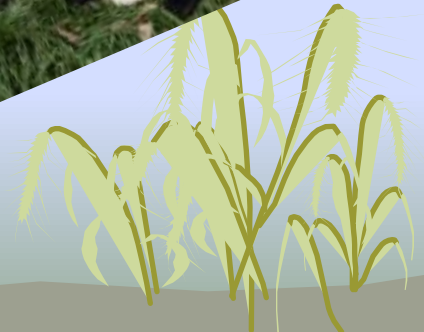

□ Littering

□ Air pollution

□ Water pollution

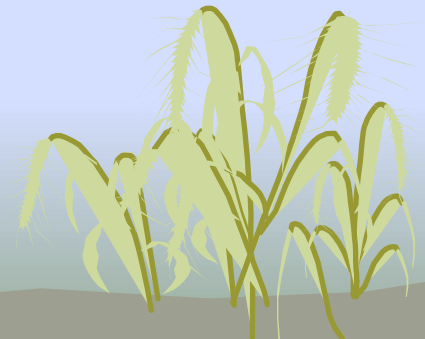

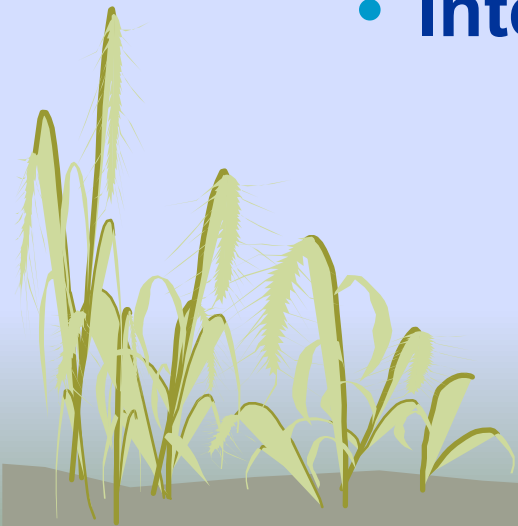

□ Endangered species

□ Destruction of natural resources

# *There are some new words and expressions from the text*

- Rare – редкий
- Vanish – исчезающий
- Insects – насекомые
- Excessive radiation – чрезмерная радиация
  - Harmful – вредный
- Interference – вмешательство

# Environmental Protection

Suppose you get out of your house on an early sunny April day and see... "Oh, what is it?" It is a yellow dandelion. It looks at you from the ground and says "Protect me, please."

Do you know how much Russian people like it? The poet Anna Akhmatova and writer Vladimir Soloukhin devoted their verse to it. Faberge, a famous Russian jeweller, made a sophisticated figure of a dandelion.

Our land is full of beautiful flowers, plants, and trees which grow and blossom in the meadows, on the banks of the rivers and lakes, in the forests and in our gardens.

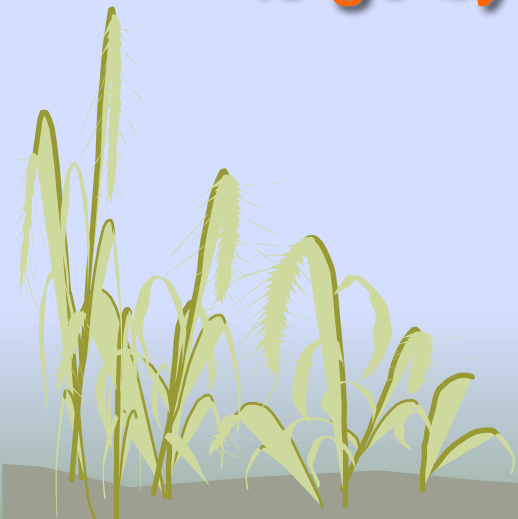

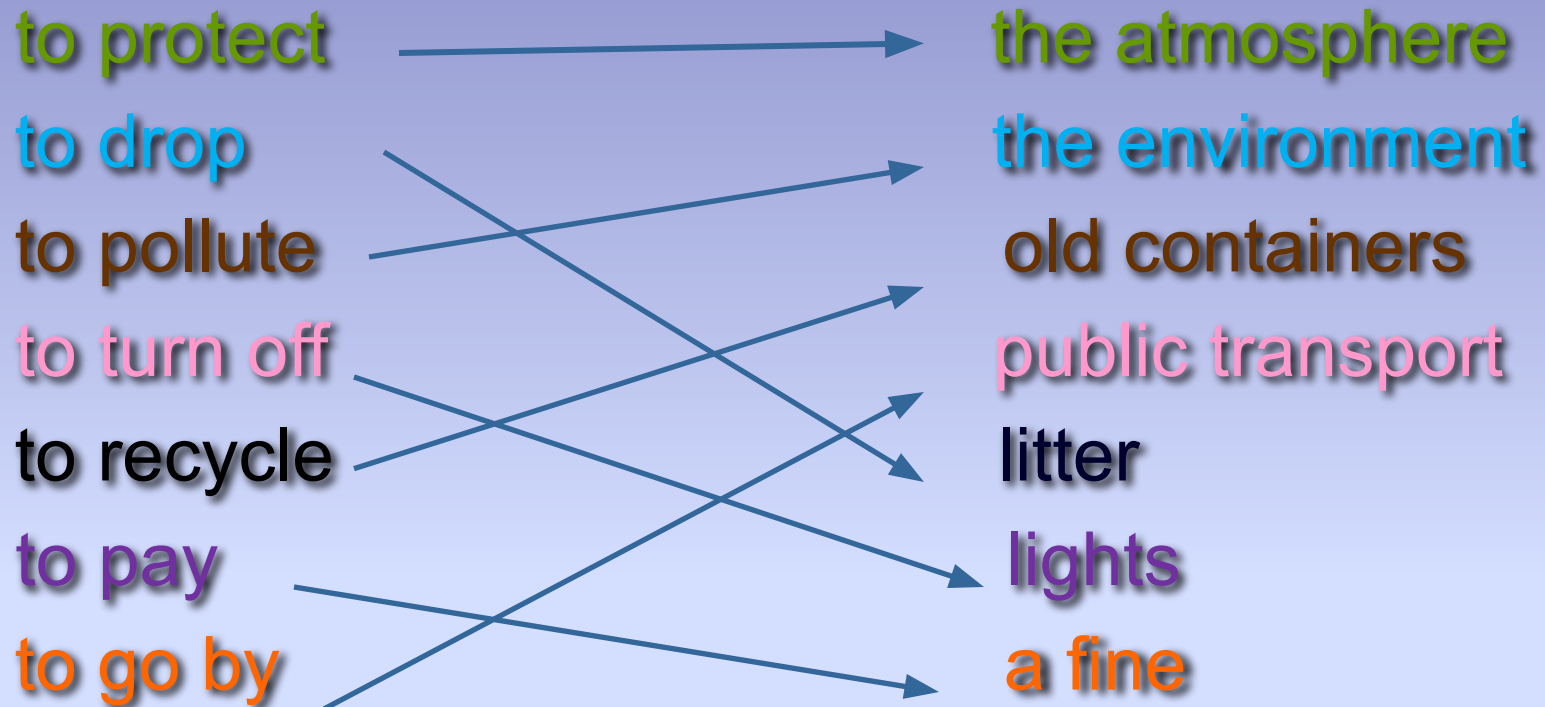

Many flowers have become rare and vanish. Our useful insects: bees, bumblebees, butterflies, dragonflies, grasshoppers, can't live in the atmosphere of chemicals and pesticides. Excessive radiation and transport are harmful to people and animals.

But industry is developing sometimes without any care of the environment.

We know that a great number of people all over the world are taking part in the policy of controlling the atmosphere, the water, the climatic changes, because of man's interference in nature.

These problems become very pressing, the subject of many scientific meetings. Let everybody remember: we live only once and not a very long life. We have one earth for all those who love it and who do not.

# *Match the verbs with the nouns:*

*Save our planet!*
