Правило

- Мы уже говорили о том, что такое артикль, и ты, наверное, привык к тому, что перед некоторыми словами надо ставить артикль a или an. Этот артикль называется **неопределенным**, потому, что он употребляется перед словами, которые называют каких-то новых неизвестных нам людей или обозначают новые впервые упоминаемые предметы. Этот артикль употребляется только с существительными в единственном числе.

Например:

It is a cat. - Это кошка(какая-то кошка про которую мы ничего не знаем).

Ann has got a dog. – У Ани есть собака(какая-то собака).

- Если же называется человек или предмет, который нам уже известен (упоминался раньше), то следует употреблять **определенный артикль-the**.

Например:

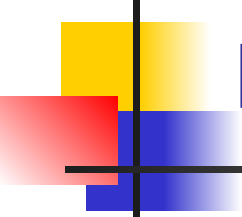

Ann has got a dog. The dog is big and black..-У Ани собака. Собака(эта собака, собака Ани) большая и черная.

- Запомни артикль не ставится перед:

-именами: Tom, Ann...

-словосочетаниями -числительное +существительное: *six cats, seven pigs.*
