

My Favourite Type of Mass Media

TELEVISION

IRINA DAVLETOVA, 7A

My favourite type of mass media is TV.

TV is the main source of news and information. It gives people an opportunity to “travel” all over the world.

Moreover, television helps us to relax and to enjoy watching the fantastic world without leaving our room. You also can escape from reality while watching TV.

My favourite TV channels are STS and TNT.

CTC

On TNT I like watching such programmes as “Comedy Club” and “Stand Up”. I like these programmes because they are funny and make me laugh.

On STS I love watching TV series
“Molodezhka”. I love it because it is about
hockey and I like watching this sport very
much. “Molodezhka” is exciting TV series
about lives of hockey players who play in the
youth hockey team.

I watch TV every day because when I come home after school and feel very tired, TV helps me to relax and can entertain me.

THAT'S WHY TV IS MY FAVOURITE TYPE OF MASS MEDIA.

Thank you for attention!
