

*Modern inventions
in our life.*

Technological progress has merely provided us with two more efficient means for going backwards.

(Aldous Huxley, English author)

Men are only as good as their technical development allows them to be.

(George Orwell)

Necessity is the mother of invention.

Microwave oven
Vacuum cleaner

Toaster
TV set

Sewing machine

Dishwasher

Washing machine

Fridge

DVD player

camcorder

MP3 player

Walkman

PDA (personal digital assistant)

radio cassette player

laptop

digital camera

video mobile phone

CD player

Are you keen on technology?

What kinds of high tech gadgets do you own?

What do you use them for?

Ban mobile phones in schools!

Do you agree?

What reasons can you think of it?

Can you think of any opposing viewpoints?

Writing skills

-, although allowing mobiles in schools can be beneficial to a certain extent, it seems to me that they are an unnecessary distraction, especially in class.
 - there are possible risks to the safety and general welfare of students if they are allowed to bring their mobiles to school. There have been quite a few cases, for instance, of students being attacked and robbed of their phones on their way to and from school. In addition, the classroom should not be used as a place to show off possessions.
 - they can be a serious distraction in classrooms. It is impossible for teachers and students to focus on classwork if there are constant interruptions from mobile phones ringing. Moreover, students cannot listen to the teacher and concentrate fully on their work if they are sending text messages or playing games.
- For several years now, schools have debated whether or not pupils should be allowed to bring their mobile phones to school. I personally believe that it is better for students to leave them at home.
- however, there are times when it can be useful for students to have mobiles at school. For example, some parents prefer their children to have their phones with them so that they contact each other during the day in case of an emergency.

Your own invention

One machine can do the work of fifty ordinary men. No machine can do the work of one extraordinary man.

(Elbert Hubbard)
