

Albert Einstein

Why I chose this person?

- I think that Einstein was a talented man
- I want to know more about the achievements of this man
- And of course I want to talk about him to my classmates

I used sites:

He developed several important physical theories:

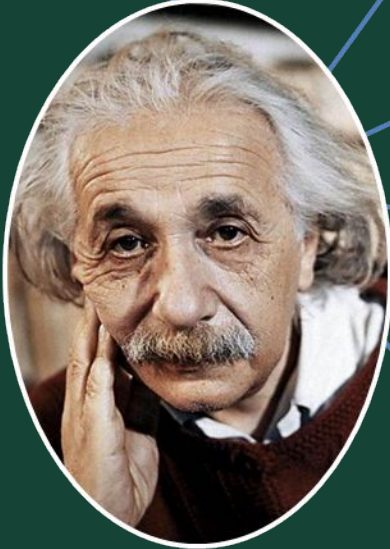

General
relativity

Bose–
Einstein
statistics

Stimulated
emission

Light
scattering

Mass–
energy
equivalence

Einstein published more than 300 scientific papers along with over 150 non-scientific works, and received honorary doctorate degrees in science, medicine and philosophy from many European and American universities.

Einstein at the
age of 4

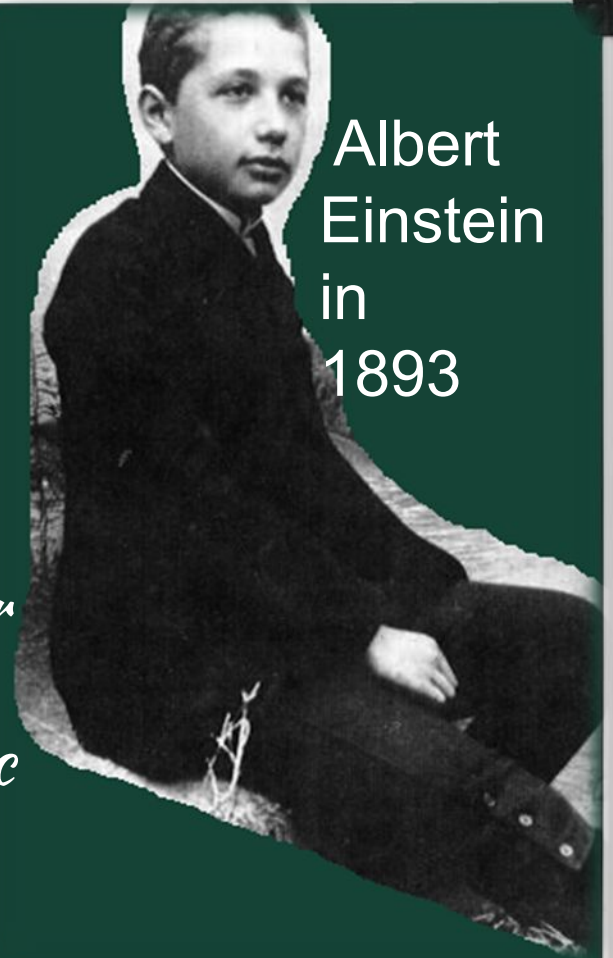

*Albert Einstein was born in the German
Empire on 14 March 1879*

*His father was Hermann Einstein, a
salesman and engineer. His mother
was Pauline Einstein*

*In 1894, his father's company failed.
In search of business, the Einstein
family moved to Italy,
first to Milan and then, a few months
later, to Pavia.*

In the spring of 1895, he withdrew to join his family in Pavia, convincing the school to let him go by using a doctor's note.

In 1896 he enrolled in the four year mathematics and physics teaching diploma program at the Polytechnic in Zurich.

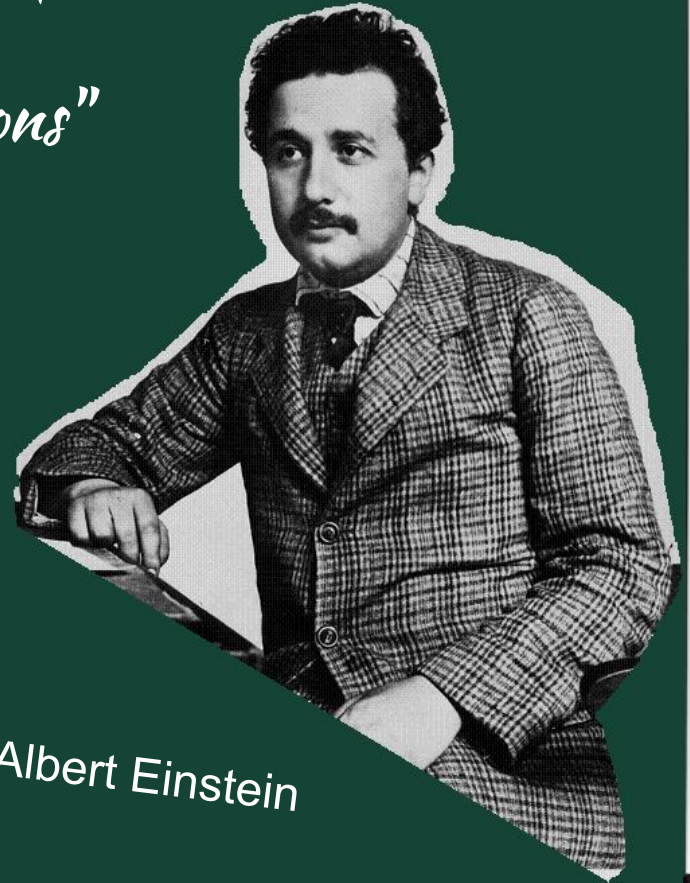

Albert
Einstein
in
1893

On 30 April 1905, he completed his thesis, with Alfred Kleiner, Professor of Experimental Physics, serving as pro-forma advisor. Einstein was awarded a PhD by the University of Zurich. His dissertation was entitled "A New Determination of Molecular Dimensions"

Alfred Kleiner

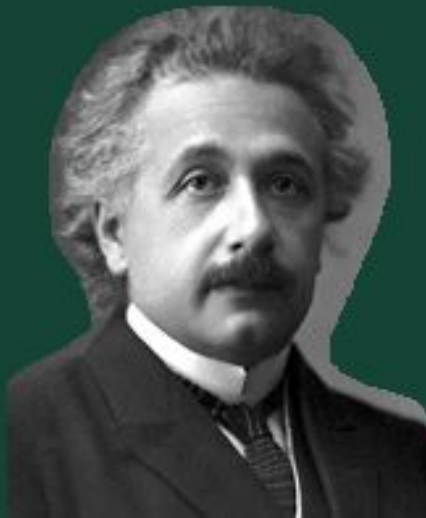

Albert Einstein

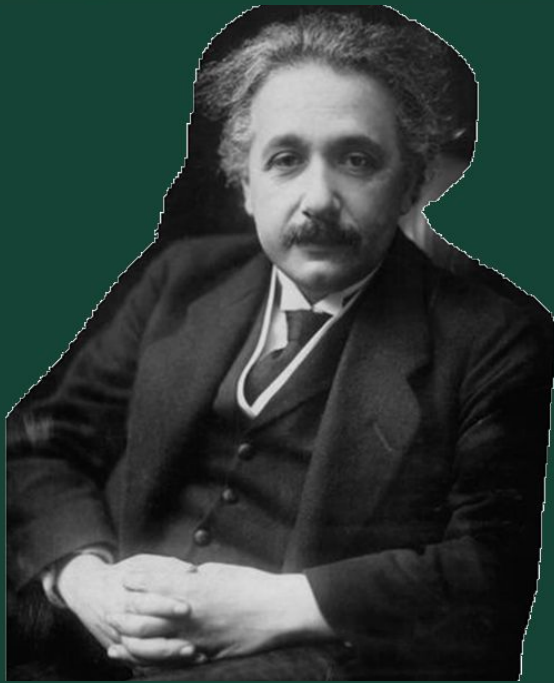

By 1908, he was recognized as a leading scientist, and he was appointed lecturer at the University of Berne.

In 1921, Einstein was awarded the Nobel Prize in Physics.

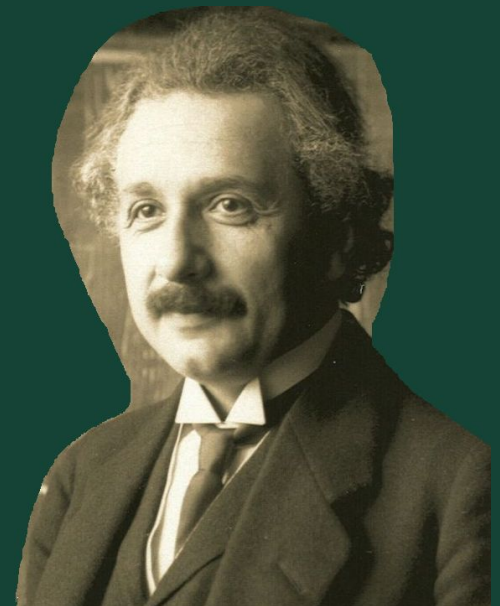

In 1911, he had calculated that, based on his new theory of general relativity, light from another star would be bent by the Sun's gravity.

In 1922, he traveled throughout Asia and later to Palestine, as part of a six-month excursion and speaking tour.

Einstein visited New York City for the first time on 2 April 1921, where he received an official welcome by the Mayor, followed by three weeks of lectures and receptions.
