

Zorbing

All about it

Zorbing it is sport

- Zorbing is an extreme sport in which a person slides down from the mountain or river.
- There are different types Zorbing.
- 1. Hill zorbing (rolling hills with)
 - Harness hill zorbing (man belts fastened inside the zorb)
 - Free hill zorbing (person is free)
 - Run zorbing (running in the zorb)
 - Hill run zorbing (running in the zorb with a small slope)
- 2. Hydro zorbing (rolling down the hill into the water inside the zorb)
- 3. Water zorbing (Zorbing on the water surface)
- 4. Snow zorbing (descent to the zorb with ice and snow hills)
 - Harness snow hill zorbing (with clip rights within the zorb)
 - Free snow hill zorbing (without attachment man)
 - Run snow zorbing (running on the surface)

Hill zorbing

- Hill zorbing one of the main types of Zorbing, where the slide is high or not high elevations. Here the ball with a diameter of 12 meters rolls with a man inside.

Hydro zorbing

- The only water sport on land! You inside the Zorb, you are sitting in a position looking down the 50m hill, you slide from side to side, forwards and backwards while the Zorb revolves around you gaining speed with every second.

Water zorbing

- Unforgettable experience, give water zorbing, which lies in the fact that a person moves in the water zorb. It gives an extraordinary experience just because you like a feather can literally walk on water.

There are several types of movement in the water zorbing. It could just be walking on the water surface when zorbonavt inside. It is also possible to run that will particularly colorful happening. In water zorbing can even take a fitness by performing exercises are not complicated, as for an instructor or independently.

Snow zorbing

- Person rolls down the hills of ice and snow.
