

Skysurfing

What kind of sport is it?

It is one of the types of parachuting.

It is a team sport

There are 2 people in a team:

a skysurfer and an airoperator

There is a special airboard on feet; it is like a snowboard

While floating in the air a skysurfer makes acrobatic tricks

Not far from him his airoperator is, in free-falling he makes video about everything his partner does

Doing their own jobs, they don't forget about the cooperation with each other

Of course, it's an extreme and dangerous sport

Scysurfing puts your life at risk, but you could experience the rush of adrenalin

This is absolutely incredible!

Try skyserfing...

A black silhouette of a person with their arms raised in a 'V' shape, standing against a light gray background. The figure is centered and serves as a backdrop for the text.
