## 5. Sale of Interest/Shares to the Third Parties

# Example

Let's assume that **Alexei** found his friend **Boris** who is willing to buy his interest for KZT 20,000.

**Maxim** does not want Boris as Boris does not have a lot of money.

**Alexei** wants to send Maxim to hell, and proceed with the deal.

Can **Alexei** sell his interest to Boris?

## 5. Sale of Interest/Shares to the Company itself

# Example

Tired of constant obstacles created by **Maxim**'s attitude & **Tanya**'s absence, **Alex** says, "Fine! I quit! Take your interest back. I do not want to be part of the firm! Let the firm take the interest back! Give me back my part of the interest in the firm!"

Let's assume that the firm has the assets left.

## 6. Forced Sale of Interest/Shares against the will of owner

## Example

Let's assume that everything is fine with the law firm.

In fact, the firm is very good. However, **Alex** as a professional is very bad. He made a bad job on a few contracts, and now the firm is facing a **huge liability suit** in the amount of KZT 1 bln.

**Can Max & Tanya get rid of Alex as a partner/shareholder?**

Alex does not want to leave.

## 7. Liability of Companies for the debts of the Owners

# Example

Let's assume now that the firm is really fine and it is **Alex who has lots of debts**. The creditors come to the firm, and demand to pay Alex's debt.

Alex's debt is **50 mln**, and the firm net assets are **50 mln**. Alex owns **20%** of it.

## 2. Legal Entity = Union

### **Legal Entity = Union of**

- People = **Partnerships**
- Capital = **Corporation**
- Work = **Cooperative**

# Practice Questions

---

# Example

**Stariko** raises KZT 1 bln. capital by issuing:

- (1) Bonds (облигации); **or**
- (2) Equity or common shares (обычные акции).

Aibek bought these securities.

**What are the differences?**

---

---

# Problem

1. Voting
2. Assets vs. liabilities
3. Order of claim

# Problem 1

Let's assume that we have transportation company **Shipco**.

## Property Structure

Assets: USD 300 mln.

Is it likely that it will receive the loan of USD 30 mln?

# Problem 1

Let's assume that we have transportation company **Shipco**.

## Property Structure

Assets: USD 300 mln.

Liabilities: USD 390 mln.

They made losses this year, and they urgently need additional 30 mln. to launch one important project.

**How legally can they solve the problem?**

---

## Problem 2 (**Risks**)

Let's assume that there is a KZ oil company called **Oilco**.

It would like to obtain a loan of USD100 mln.

Let's assume that Bank A is willing to give them the loan at 11% interest.

## Problem 2 (**Risks**)

The structure of the interest is the following:

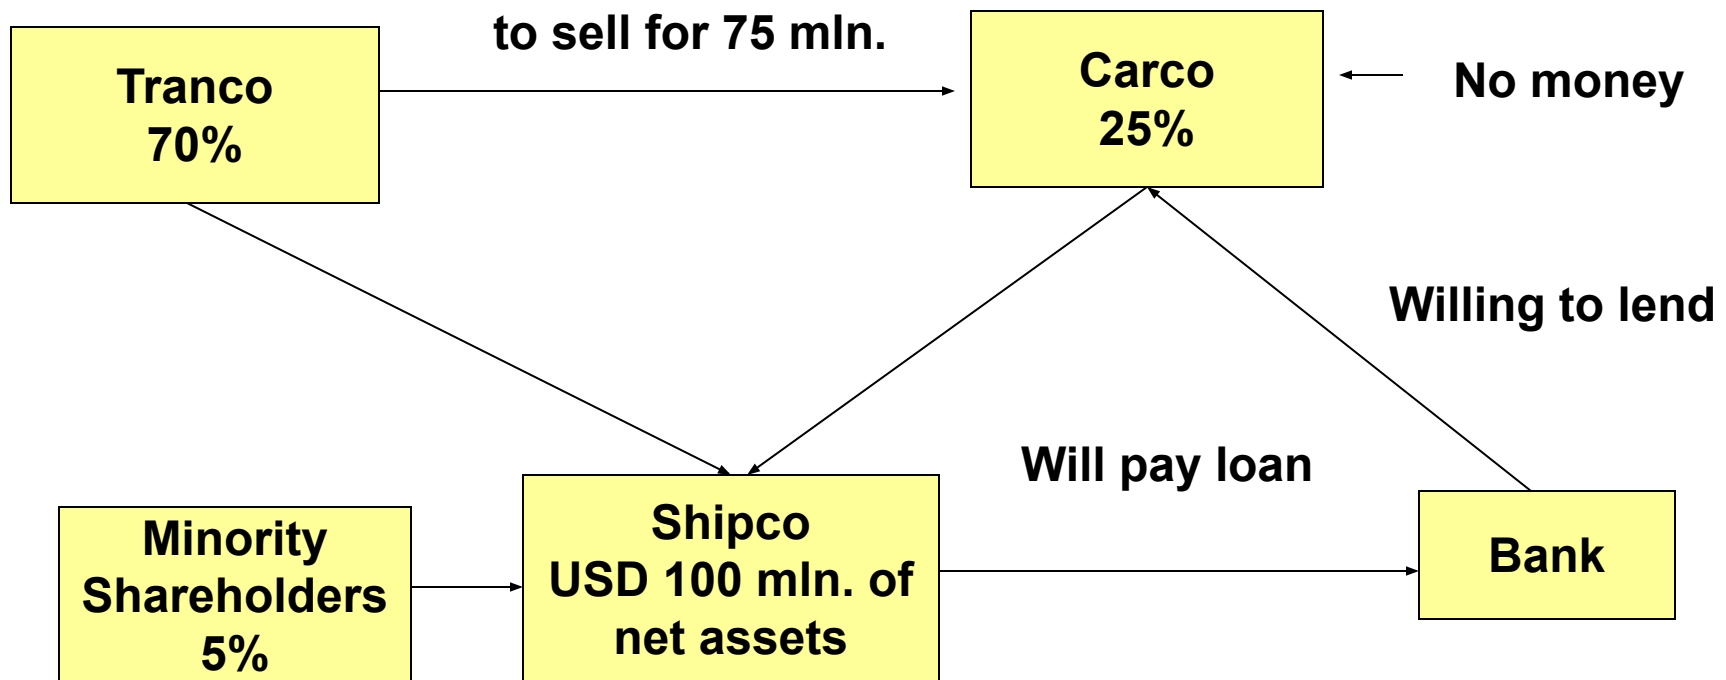

- (1) Country risk - 5%
- (2) Price risk – 3%
- (3) Default risk – 1%
- (4) 2% are the rest.

**How legally can they reduce the risk, i.e., reduce the interest?**

## Problem 3 (Risks)

Let's assume that we have the following corporate structure:

**\*Pay attention to Income Tax**
