

CITY OR COUNTRY

PLAN

1.Introduction

2.Main Body

2.1 City

a) advantages

b) disadvantages

2.2 Country

a) advantages

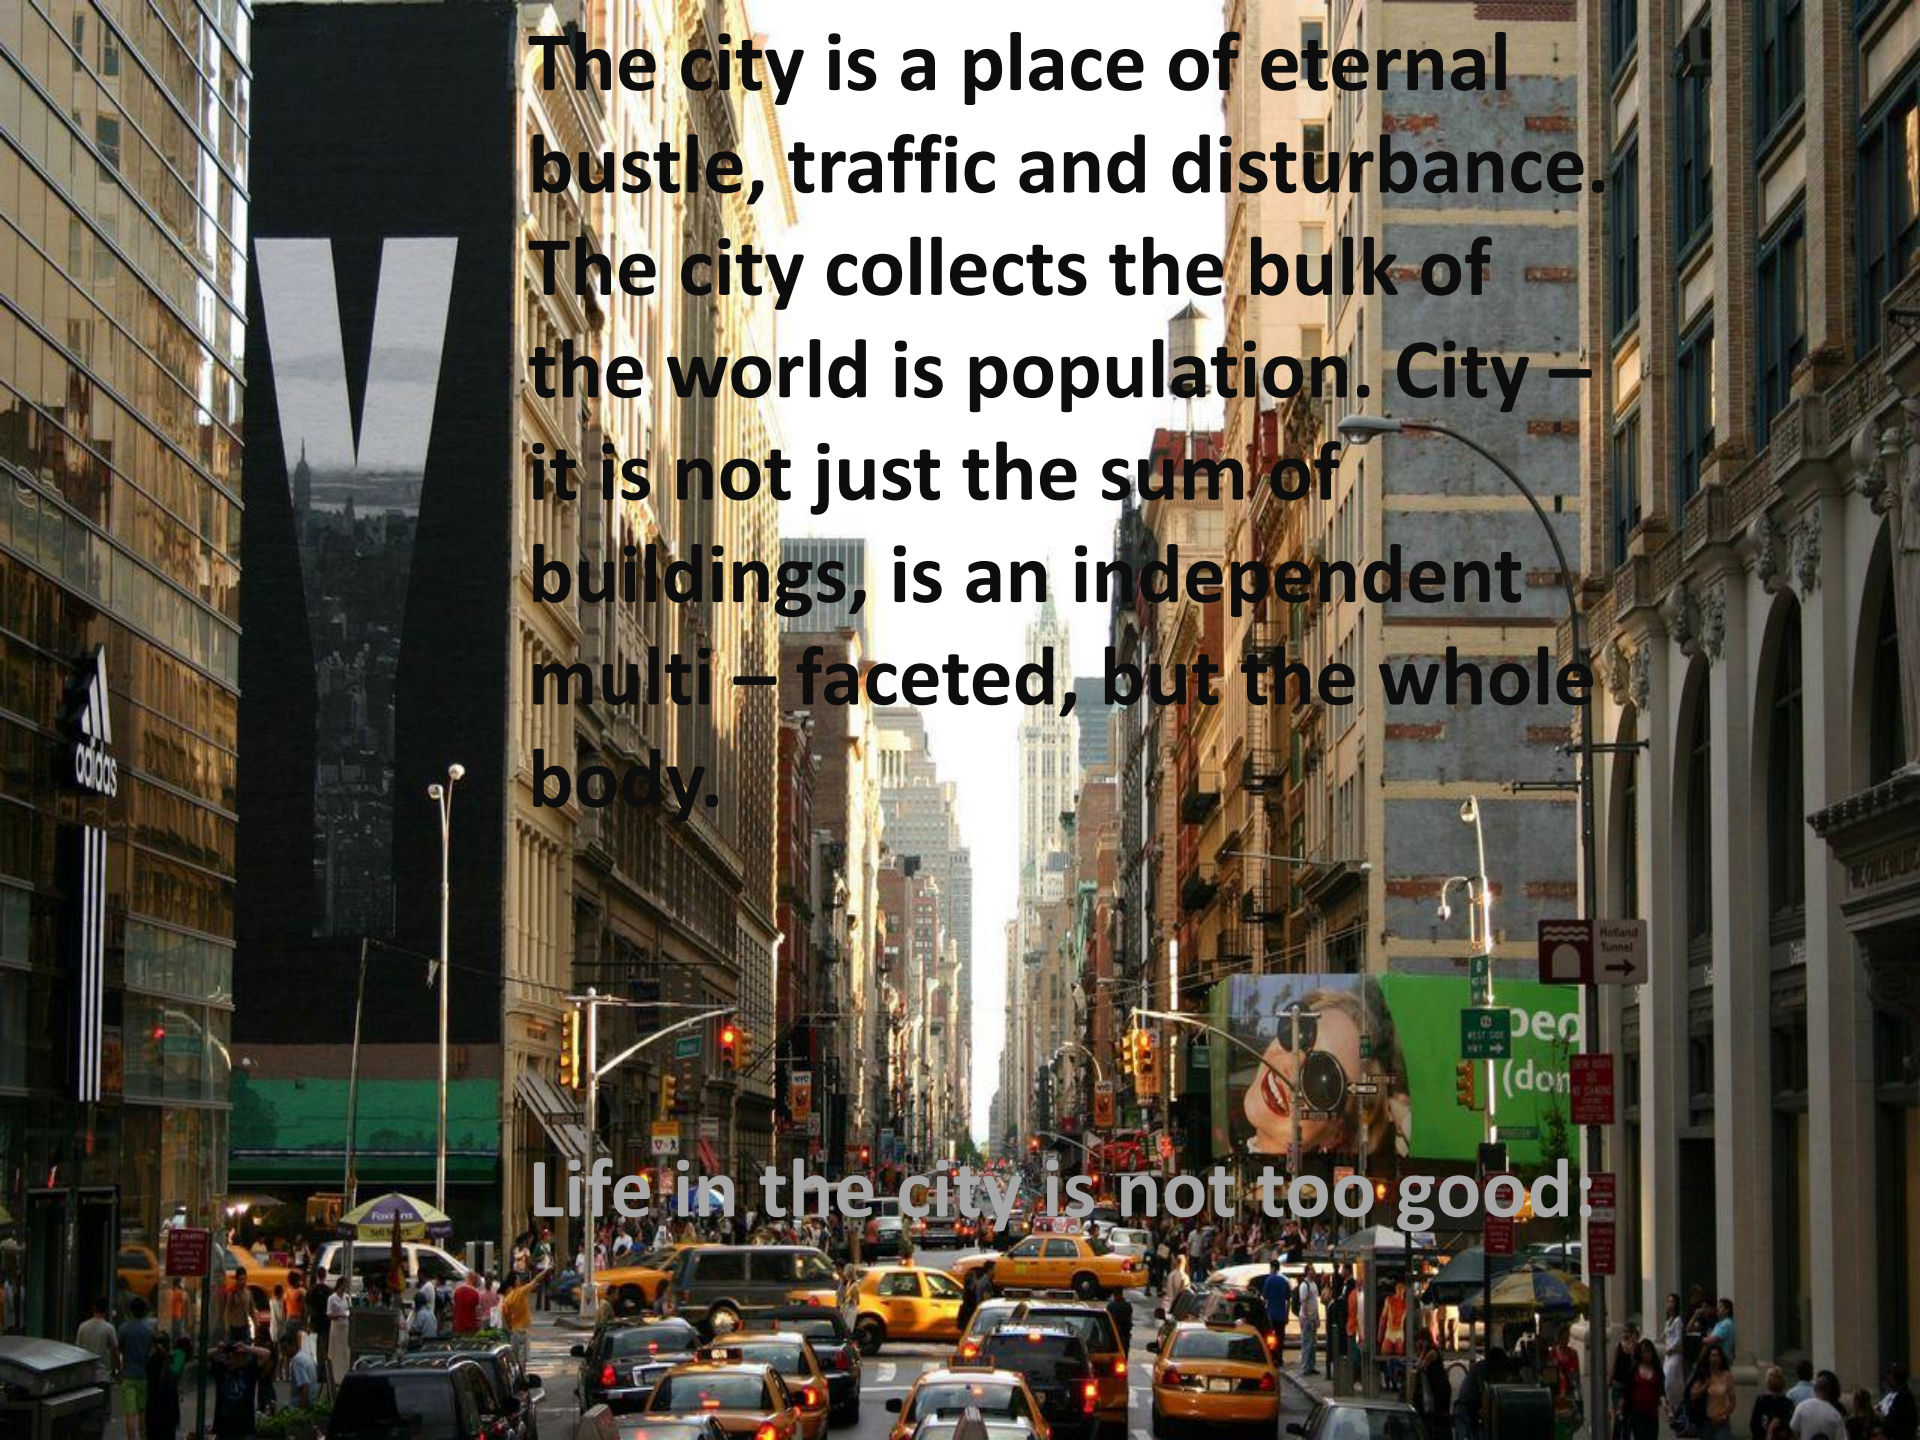

b) disadvantages

3.Counclusion

The essence of this presentation is to figure out where to live better: in the city or in the country. I will give the advantages and disadvantages of living in these areas, but the choice will be yours...

A wide-angle photograph of a busy city street, likely in New York City. The street is filled with yellow taxis and other vehicles. Pedestrians are walking on the sidewalks. Tall buildings line both sides of the street, with a large black 'W' logo visible on the left. A large billboard on the right shows a woman's face. The sky is bright, suggesting daytime.

**The city is a place of eternal
bustle, traffic and disturbance.
The city collects the bulk of
the world is population. City –
it is not just the sum of
buildings, is an independent
multi – faceted, but the whole
body.**

Life in the city is not too good:

- air is polluted

- a lot of dust in the streets

- a lot of factories

- cinemas

- museums

- restaurants

- parks

ADVANTAGES

A LOT OF:

The country combines concepts such as peace of mind and solitude with nature. Barnyard, garden, clean air and untouched nature just provide comfortable life.

Advantages:

- pure air

- beautiful nature

- no factories which pollute atmosphere

I think the lack of just one – not entertainment.

And in conclusion, i want to say, that is I have to choose between city and country, I would have chosen a country.

THANK YOU
