

*Demographic situation
in Ukraine*

The Demographics of Ukraine are the demographic features of the population of Ukraine, including population growth, population density, ethnicity, education level, health, economic status, religious affiliations, and other aspects of the population.

The population is decreasing, with an increase in the death rate among working-age people and a negative balance of external migration.

- a reduction in the birth rate**
- an increase in the death rate**
- the unsatisfactory state of the health of the population**
 - an excess of the level of emigration over the level of immigration**
