

World Englishes

Variants of English

Australian English

- Divergence of Australian English from BrE can be dated back to 1788 when the first penal colony for British convicts was set up. They spoke mostly Cockney. In 1827 when the speech of Australian residents was described, strong Cockney impact was noticed.

Australian English

- During Australian gold rushes in the 1850s Australian English borrowed increasingly from external sources.
- Americanization of Australian English occurred during massive influx of American troops during WWII and increased later in the 1950s due to television, movies and mass media.

Australian English

- Australian English has a lot in common with New Zealand English, however the difference is obvious to a speaker from either country.
- Australian Corpus of English

Australian English

- British spelling prevails, correlation of British and American spelling in 3:1 (-ise VS ize)
- There is some influence of Hiberno-English as many people are of Irish descent. Irish impact is seen in the use of me instead of my: *What's me hat?*

Australian English

- Some words in Australian English are unique like *bush* – remote, sparsely-populated areas.
- Some elements from Aboriginal languages (places, flora, fauna) were incorporated like *kangaroo*.

Australian English.

Regional Vocabulary

Pork products are known

- in South Australia as *fritz*
- In Victoria as *stras*
- In New South Wales as *devon,*
- In Western Australia as *polony*
- In Queensland as *windsor*
- In Tasmania as *belgium*

Australian English. Intonation

- Stereotypically Australians have a rising tone/ questioning intonation known as high rising terminal.
- There are lots of regional patterns

Australian English as a sociolinguistic phenomenon

- Broad Australian English
- General Australian English
- Cultivated Australian English

Australian English

- Cultivated Australian English (CAE) is similar to RP. 3 -10 % population speak CAE. Common among public figures.
- People speaking CAE are ridiculed as aloof, snobby, affected.

Australian English

- General Australian English - stereotype of Australian English, the language of movies & TV.
- Broad Australian English is a recognizable variety due to accent, known for long diphthongs and nasal drawl.

Australian English

Humour

- Inherited from Britain and Ireland is deadpan humour when a person makes extravagant, outrageous or ridiculous statements in a neutral tone, indicating it is humour. Tourists might be told jokes about kangaroos hopping across the Sydney Harbour Bridge.

Australian English

Due to caricaturised over-use some Australian phrases dropped out of use.

"Wogspeak"

- The term “wog” was originally a derogatory term for migrants to Australia from non-Anglo-Celtic countries (particularly Southern and Eastern Europe).
- It has in recent years been refigured as a term used by those groups for themselves, and for them marks the solidarity in their common experiences of migration under less than ideal circumstances.

"Wogspeak"

- The variety referred to as "wogspeak," is also referred to as "New Australian English" (NAusE).
- It is thus clearly as much a social and ideological construct as a linguistic one.

New Zealand English

- NewZild = New Zealand English
- NZ= New Zealand

New Zealand English

- Influence of Australian English, of Maori speech.
- Some traits of old dialects of low-class English of the 19th c. survived in NewZild
- Wellington Corpus of New Zealand English

AmE He suggested they_____ apply..

5. Irregular verbs in AmE form past tense forms as regular verbs (learned, leaped, spelled)

BrE VS AmE: grammar

- AmEng: I suggest that Susie take the job.
 - BrEng: I suggest that Susie takes the job.
-
- AmEng: The report recommends that he be promoted.
 - BrEng: The report recommends that he is promoted.

BrE VS AmE: grammar

- AmEng: I suggested that Susie take the job.
- BrEng: I suggested that Susie took the job.

- AmEng: The report recommended that he be promoted.
- BrEng: The report recommended that he was promoted.

British VS American English

6. Usage of prepositions: AmE to meet with someone

Monday to Friday , AmE Monday thru Friday

In Churchill Street, AmE on Churchill Street

7. BrE towardss, backwardss AmE toward

Modern English Grammar: Vision & Terminology

Corpus Linguistics contribution.
Cambridge International Corpus (CIC)

North American English Grammar

- Written grammar displays fewer differences between BrE and AmE than spoken grammar.
- American influence on everyday English grammar is considerable, for example, *like* as a marker of direct speech reporting.

Shall

- *Shall* is infrequent in AmE, they prefer *will or be going to*.
 - *I shall be in the office at 9.30.*
- *Frequency of shall per 1 million words*

■ <i>BrE</i>	<i>AmE</i>
118	16

Shall

- However, AmE allows *shall* in first person interrogatives, especially functioning as suggestions or in semi-fixed expressions:
 - *Let's try to find other words, shall we?*
 - *How shall we say it?*

must

- *Must* is much more frequent in BrE than in AmE which prefers *have to* to express obligation.
- *Frequency of Must per 1 million words*

■ <i>BrE</i>	<i>AmE</i>
450	151

have got to

- Modal *have got to* is twice more frequent in spoken BrE than AmE.
- Have to (without got) is twice more frequent in AmE.
- *I've got to go and meet my mother at the station.*

Had better

- *Had better* is 6 times more frequent in spoken BrE than AmE.

Be going to

- *Be going to* (and the contracted form *gonna*) are not a characteristic use in BrE, which prefers imperatives in direction-giving:
- *You're gonna to go two blocks and then you're gonna to see a big modern white building... (AmE)*
- *Come to T-junction, turn left. Go down..., you come (BrE)*

guess

- *I guess* is 30 times more frequent in spoken AmE than in BrE where *I suppose*, *I reckon* are more frequent.
- *I reckon we should have more coffee after this* .

Be & Not

- Negated forms are found in both variants, though in AmE stronger preference is observed for *not* in both present and past tense forms:
- *Tim isn't working there any more. (BrE)*
- *Joe is not working there any more. (AmE)*

Have got

- The present tense form of *have* with *got* is more than twice frequent in spoken BrE than AmE:
- *I've got one sister and one brother (BrE)*

Get

- In AmE, get has an –ed participle form gotten, which is not used in BrE:
- *I mean, as poverty has gotten worse, you know, education has gotten worse...*

Ir(regular) verbs

- In AmE, the past tense of *fit* is most often *fit*, while in BrE *fitted*:
- *Jennifer says she never really fit in...*
- *I found a pair of boots that fitted me*

Ir(regular) verbs

- Verbs such as burn, dream, lean, learn, smell, spell, spill often allow a past tense and –ed ending. AmE overwhelmingly prefers –ed ending.

Interrogative tags

- Interrogative tags are around 4 times more frequent in BrE than in AmE:
- *He's brilliant, isn't he?*

copy tags

- In informal contexts, AmE speakers often use an interrogative copy tag with rising intonation in responses involving surprise or emotional involvement:
 - *I changed schools three times*
 - ***You did?***
 - *In one year.*
 - *Wow. Wow.*
- *In BrE **Did you?***

copy tags

- Affirmative copy tags occur in both variants but are much rarer in AmE than in BrE:
- *I think it's really funny that they live together, **I do.** (BrE)*

right?

- The universal tag, *right?* is 4 times more frequent in AmE than in BrE:
- *You lived in Canada, **right?** (AmE)*
- *I was hoping we could change this one, **right?** (BrE)*

Tails

- *Tails* are considerably less common in AmE than in BrE, but they do occur in informal spoken AmE:
- *That was a nightmare, **that one**.* (BrE)
- *He's a scary guy, **that Dan Boland*** (AmE)

Really → real

- In informal spoken AmE, *really* is often used as a modifier of adjectives and other adverbs without the -ly ending. This is sometimes considered non-standard by traditionalists:
 - *We all get along real well.*
 - *They were real nice to us.*

Well, good

- Good is often used in informal spoken AmE where BrE requires well:
- *Hi, how are you doing?*
- *I'm good.*

Present Perfect

- Present Perfect is less frequent in AmE where the tendency is to use Past Simple.

exclamative

- AmE uses some exclamative and intensifying expressions which are not common in BrE: *geez, goddam, oh my gosh:*
- *It was the best tasting **goddam** stuff I've ever eaten in my life.*
- *It's been eighty degrees here.- **Oh my gosh!***

African American English

- Within the last several decades, it has gone through a number of name changes, which include
- *Negro Dialect, Nonstandard Negro English, Black English, Black English Vernacular, Afro-American English, African American (Vernacular) English, African American Language, and Ebonics.*

American English & other languages

- Words which seem to be spreading widely and rapidly include *gas*, *guy(s)*, *Hi*, *movie*, *truck*, *Santa (Claus)*, and *station wagon*, and adolescent slang and fashion terms like *man* as a form of address or *cool* meaning 'very good'.

American English & other languages

- older words which have been internationalized so strongly that their American origin may no longer be recognized in many communities, like *radio* (for older British *wireless*), *commute*, *fan*, *star*, *know-how*, *break even*, or *let's face it*

American English & other languages

- American pronunciations are getting more widespread, e.g.,
- *research* stressed on the first and
- *primarily* on the second syllable,
- *schedule* with /sk-/,
- *lieutenant* with /lu:-/, etc.

American English & other languages

- The spelling *center* is clearly preferred over *centre* outside specifically British spheres of influence, and *program* rather than *programme* is also used widely, not only in computing contexts.

American English & other languages

- American influence can even modify the meaning of words, as in the case of *billion*, which now means 'a thousand million' rather than 'a million million' even in Britain.
