# Notes

- Welcome with audience
- AIM
- Talk about subject
- Main points.
- Summary
- Make conclusion
- Answer

# Aim

- To introduce with global ecological problems
- To determine the main problems.
- To give advices for keeping our environment clean.
- To show different ways of solving of ecological problems in Ukraine

- Ukraine has got a lot of ecological problems. Most problems are caused by human activities and global warming. Ukraine experienced earthquakes, floods, storms and snow storms, draughts, wildfires.

Because of the climate changes recent years Ukraine has suffered from floods in Western Ukraine. The natural habitat of animals, plants, birds and insects has been destroyed too. It disturbs the natural balance.

Frequent droughts kill crops and grass which is the food for domestic animals.

# Summary

- Most popular problems in Ukraine is a pollution of air, water and soil; littering and deforestation.

Ukraine people suffers from different allergies and problems with breathing because of air pollution and chemicals in water and food. A lot of people die young because of Chornobyl disaster.

# How can we keep our earth clean?

- **Don't buy drinks in plastic bottles.**
- **Save your family newspapers. Find out how**
  - **to recycle newspapers in your area.**
- **Save water: if there is the leaky tap in your**
  - **house, get someone to fix them.**
- **Turn off the lights when you leave the room.**
- **Use public transport or walk.**
- **Don't cut wild flowers.**

# Conclusion

- Finally, Scientists and engineers can find the ways to reduce pollution from automobiles and factories. Government can pass the laws that would make enterprises take measures for reducing of pollution. Individuals and groups of people can work together to persuade enterprises to stop polluting activities.
- We can recycle our wastes; persuade enterprises to stop polluting activities, because it is apparent that our careless use of fossil fuels and chemicals is destroying this planet. And it is now more than ever apparent that at the same time we are destroying our bodies and our future
