

The greenhouse effect is when the temperature rises because the sun's heat and light is trapped in the earth's atmosphere.

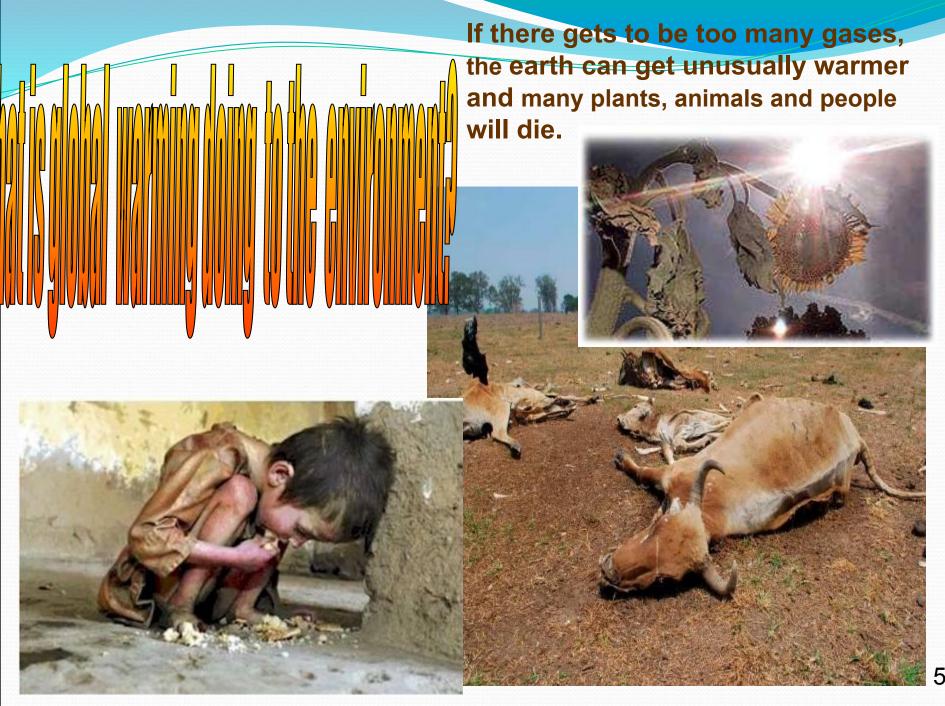

Greenhouse gases are gases in the Earth's atmosphere that collect heat and light from the sun.

Solar radiation passes through the clear atmosphere. Most radiation is absorbed by the Earth's surface and warms it.

Without greenhouse effect the earth would be freezing or ,on the other hand ,it would be burning hot.

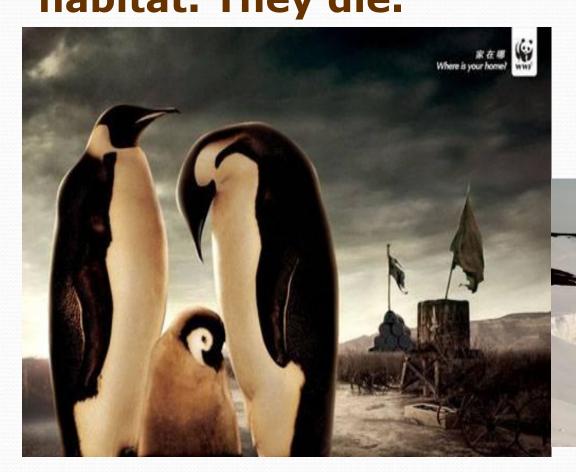

Global warning make the sea level become higher.

Water covers many low land islands. Animals lose a source of food in their habitat. They die.

Global warning destroy forests, kill animals. In the forests some plant and tree leaves can be so dry that they catch on fire.

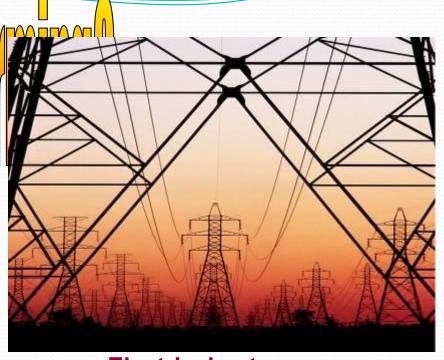

Electrical pollution

Heating a meal in the microwave

Using a washing machine

Electrical nets

Using an air conditioner

Watching TV

Listening to CDs

Playing computer games

Using sprays

Water and Oil

Recycle

1.Recycle

2.Plant trees

3.Turn off television, computers and lights when we leave home

4. Walk instead of driving a car
