

How to cook scrambled eggs?

What do you need?

- 2 eggs
- some sunflower oil
- salt, pepper (optional)

Step 1

- Take a medium-sized frying pan, put it on the gas stove, add some sunflower oil so that it would cover the whole surface and wait the pan to heat for a minute or two.

Step 2

- Then break the eggs and carefully place them into the pan so that small pieces of the eggshell wouldn't go into it.

Step 3

- Wait for 5 minutes or so. Don't forget to add a pinch of salt or pepper if you like.

Step 4

- When the dish is done, put it on the plate.

Step 5

- Also you can serve your scrambled eggs with some fresh vegetables (tomatoes or cucumbers, for example) or pour it with ketchup.

Have a good meal!
