

Important environmental issues.

A stylized, monochromatic illustration in shades of teal and grey. It depicts two hands, one from the left and one from the right, reaching towards each other and shaking in a firm grip. The hands are rendered with simple, bold lines, giving it a graphic, almost logo-like appearance. The background is a solid dark teal color.

Now people are killing our planet.
Pollution is very dangerous for people.

Country air that used to be clean and
fresh, now contaminated plants and
factories. Every year people cut down
trees, it leaves fewer fields and woods.

Millions of animals die each year
because people pollute their natural
homes. We live among the garbage and
waste-gas vehicles, disposable
packaging.

In my city, people do not think about their future, if they continue so will contaminate the city in which they live, but people just simply die. In the city people are constantly and strive to throw some garbage in garbage cans outside. They do not even think about the consequences. But this is not the worst. The worst thing is the plants and transports. That's exactly what pollutes our atmosphere.

How to deal with these problems?

- First we need to understand the man himself so that this can not continue.
- People need to learn to do without the car less, walk more.
- We must learn not to use plants for their own purposes, if it is not possible, then at least learn to use it in smaller quantities

In our time, much has been done in order to deal with these problems.

The end

Thank you for your attention.
