

# IN TWENTY YEARS' TIME

By Mareseva Anastasiya

- Most people will be communicating by the Internet and real relations will have been deficit. Cafés, restaurants, cinemas will have almost disappeared.

- Most people will be using public transports or bikes or rollers to go to work. cars will be using just for traveling out of cities and towns.

- Sidewalks will be having speeds ways.

- People's health will have worsened. Immunity of each person will have fallen off the lowest point and people will be suffering from different diseases much more. Pharmacology won't be helping but will be killing.
- And just few people will have understood that they need activities and exercises.

- Good natural food will have ended. Just rich persons will be eating real non-synthetic food.
- Possible some food will be printing to the 3D printer

- Some towns will have united, some will have disappeared and big cities and megacities will be being more and more. And buildings will be being higher and higher.

- Natural resources will have used up.  
Humanity will be trying to make alternative resources.

- Many married couples will be forming from people of the same sex.

- Gadgets will be implanting in human bodies for more productive using.

- Ecology will have worsened. Biological diversity will have been less. Many species of animals, fishes, insects and plants will have been extinct.

Thank you for attention!
