

KIND HEART

FIND YOUR HEART TO GIVE LOVE 2

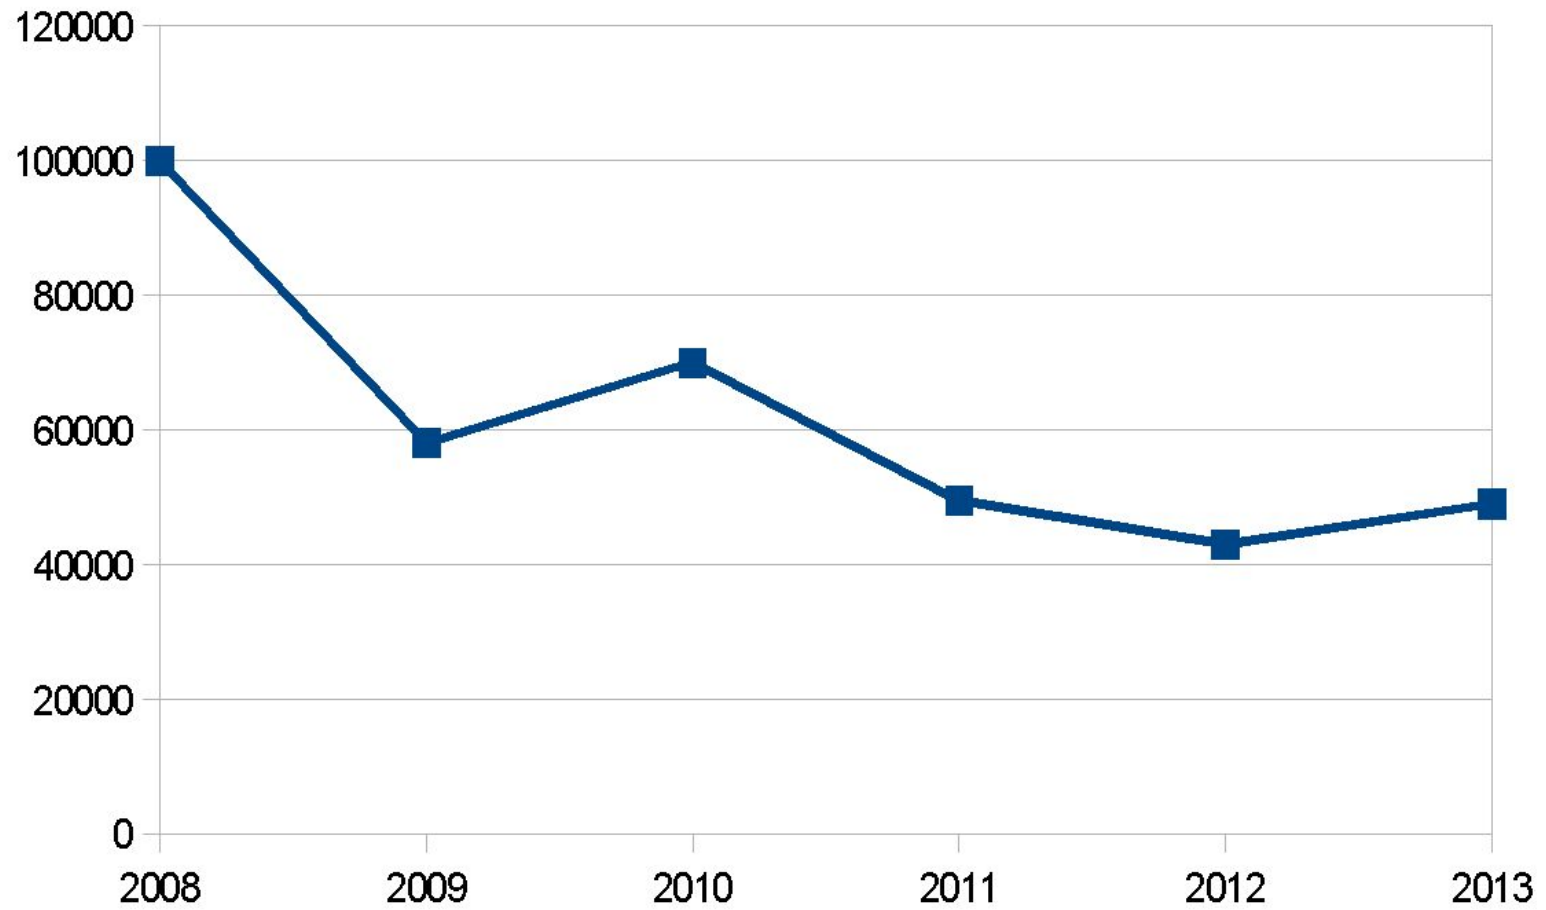

Ksenia Benner,
Russia

Number of stray dogs in Moscow since 2008 to 2013

The purpose of my project is to reduce a number of stray animals in the streets.

The aims:

- Helping homeless animals by building a shelter getting some donations from people. Or instead of building a whole new shelter, looking for someone in the community who is willing to dedicate part of their house or some unused – but already constructed – shelter like establishment.
But firstly,
- organizing a charity community or “society” that'll be eager to persuade others to do it.
- finding volunteers!

The goals:

- Organizing a company that will start working for the project, some volunteers that will be for the idea.
- Organizing a class in schools and universities that will explain basics of my idea and the profits of it.
- Finding sponsor to provide money for building shelters and hiring qualified educated workers.
- In addition to private donations, I will also consider a grant.
- Finding workers that can build the shelter.
- Finding equipment for the shelter.
- Hiring workers to take care of found animals.
- Finding people and companies that will be able to invest some money in the shelter to provide food, medicine for strays.

The steps to achieve the goal:

Step 1. *Finding a place to arrange a class for students and pupils to raise the awareness of the problem. This step is mostly aimed at volunteering.*

Step 2. *Sponsoring my project, finding grants.*

Step 3. *Finding workers that can build the shelter.*

Step 4. *Finding equipment for the shelter.*

Step 5. *Hiring workers to take care of found animals.*

Step 6. *Medicine and food.*

Thank you!
