***Welcome***

# Consciousness

Soul, Atman

Body

Mind

y

**When we look into the midnight sky  
we see a Universe which is so vast.**

**For example:**

**The light from this galaxy had been  
travelling for 14 billion years through  
empty space before it was finally  
captured by our camera lens.**

# The Two Schools of Philosophy

## Realism (Materialism)

Mind comes from matter

As the unit mind is the highest point in this entire creation, the most evolved mind has the right to dominate all other material objects

## Anti-Realism (Idealism)

Matter comes from mind

As all of the material objects are creations inside of the mind, they should be treated as some sort of illusion and not taken seriously

**microwita**

matter comes from the Supreme Mind  
and the unit mind comes from matter

The image features a dark blue, starry background with a prominent, glowing blue nebula or galaxy structure. The text is centered and written in a clean, white, sans-serif font. The overall aesthetic is cosmic and ethereal.

Cosmic Consciousness is the  
Source of this Vast Universe

It is important here to mention that matter is not just bound up energy, but Consciousness bound by energy

This is the eternal play between Cosmic Consciousness and Cosmic Energy otherwise known as Shiva and Shakti

**From the Oneness emerges a factor  
called the Ether  
The name in Sanskrit is *Ákáshatattva*.**

**Once the elementary particles emerge from the void the combine to form atoms such as hydrogen. The hydrogen comes together to form gigantic clouds called Nebulae.**

**This factor we call the Aerial factor in Latin, or Váyutattva in Sanskrit.**

**The atoms in these clouds are pulled together by gravity so tightly that they ignite in a nuclear reaction and become stars.**

**Due to their ability to give off heat and light, they are known as the Luminous factor or Tejastattva in Sanskrit.**

**An indication of the level of the evolutionary advancement is, in the complexity of the brain and of the endocrine system**

**A more complex mind will require more subtle exchanges with the environment.**

# Brahmacakra

Theory of evolution :  
not only survival of  
the fittest: evolution  
of consciousness  
towards reunion with  
Brahma

600 MYA

Who am I?

Do I have **Mind**?

What is **Mind**?

”Dyaśtīdehe Cittāñu samavāya ena  
Due to excessive clash within the unit  
structure, some Citta bodha  
and cittañu, or mind stuff, is evolved.”  
“Through the combination of ectoplasmic  
particles in the unit structure, the feeling of  
citta evolves”

Tiivrasauñgharśeña Cúrñibhútāni  
Jadāni Cittāñu Mānasadhātuh Vā

“As the influence of the guñas wanes and  
Cittát: Guñávakśaye Rajoguñaprábalye Aham  
rajoguña becomes dominant, the aham  
“Through the combination of ectoplasmic  
evolves out of the citta  
particles in the unit structure, the feeling of

citta

“As the influence of the guñas wanes and rajoguña becomes dominant, the aham evolves out of the citta”

Súkśmábhimukhinii Gatirudaye  
Aham'tattvánmahat

“With further movement towards the subtle,  
the mahat evolves out of the aham’tattva”

**In the same way, the highest point of evolution of a human being is to become a living embodiment of that source of Oneness.**

# Brahmacakra

“All living beings seek happiness”
