

My future profession

Floristics

Floristics (from armor. flora), or Floristic design (English Floral design) — a kind of arts and crafts and design; creation of floristic works (bouquets, compositions, a panel, collages) from various natural materials (flowers, leaves, herbs, berries, fruits, nuts etc.) which can be live, dry or tinned.

- Floristics call drawing up bouquets and decorative compositions of flowers and natural materials. The floristics as a type of arts and crafts, uses both the live and dried flowers and plants. The variety of natural gifts gives to floristics huge opportunities. Here is where to clear up imaginations. In other words, the floristics is called the art cloth "written" by herbs, leaves, flowers.

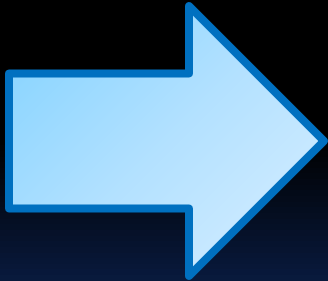

The embodiment of a creative rush, feelings and the imagination of the person occurs by means of drawing up compositions, pictures, a panel and collages gifts of flora. The art cloth is created without brush and oil paints. Paints and the invoice of natural material are natural and unique, we won't compare them to the artist's palette. Comparison isn't pertinent, it absolutely other original form of art. Maybe someone will tell that floristics it is difficult also the hands, that is is independent, it is impossible to create an art masterpiece. We won't apply for a masterpiece, and we will try to create small composition or a panel for an interior of the house. Now literally briefly from what we create beauty.

Styles of floristics

Massive style

By rules of this style
within arrangement
partially or completely is
absent an empty seat

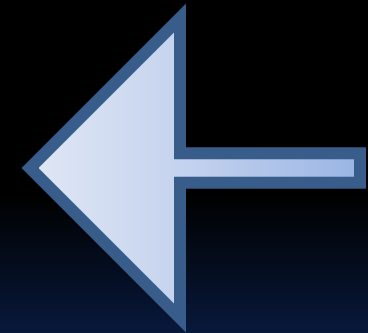

Linear style

- Defining is existence of an empty seat within composition borders

Linearly - massive style

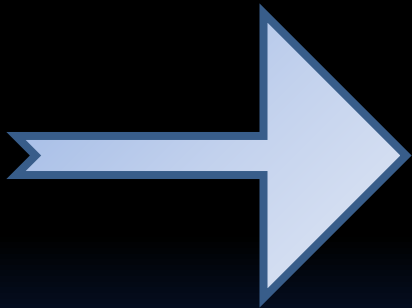

01
11/11
11/11

The mixed style

Arrangement which isn't possible for carrying to one of above-mentioned styles.

- Strict style, assumes use of various geometrical forms, and in free style avoid strict geometrical forms. Perhaps, it will seem strange, but creation of rather beautiful arrangement in free style requires not less art skill, than for creation of impressive composition in strict style.

Gothic style
