

***My school in the
history of our town***

Some history pages

- Our native town was founded on the 26-th of December in 1938. Long ago this place was called “Zatishye”. There were a lot of marshy places around it. Nobody could know that instead of “Zatishye” a big and important city would grow.

- In 1916 not far from “Zatishye” two big plants were built. The master of those plants was N.A.Vtorov. Those plants put the beginning to our beautiful and modern town. That’s why we call N.A.Vtorov a founder of our town.

- The first school was situated not far from the railway station. It was one-storied building, very small and uncomfortable.

The first teacher of the first school

- L.K. Alekseeva worked at school for 35 years. She gave all her best years, her grateful heart to the children. During the Great Patriotic War She did not refuse from her hard work. L.K.Alekseeva taught the children, helped them to endure the horrors of the war.

Our people have always glorified Electrostal. The gradulators of our school defended our Motherland during the War. Many of them were awarded by orders and medals. P.P. Kuleshov was a “Hero of the Soviet Union”. Very often he came to his school and met with the teachers and the pupils. He told about himself, about the exploit of the Soviet people during the Great Patriotic War.

Our school today

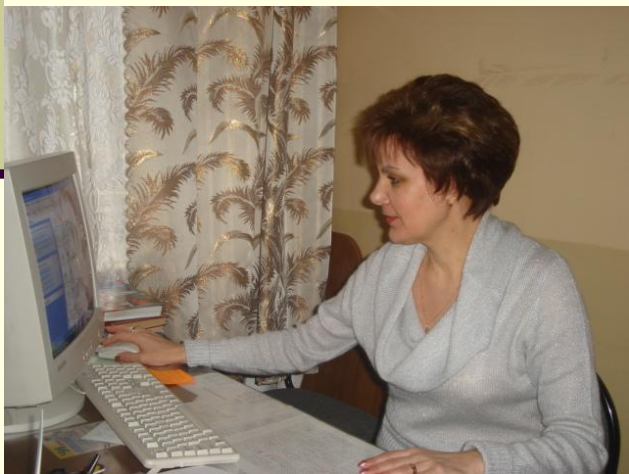

- Many years have passed since the first ringing of the school bell. Our school is proud of its graduates. There are scientists and engineers, doctors and teachers, workers and clerks, sportsmen and military men.
- Z.V. Lysenko and O.L. Popova studied in our school. N.G. Kokunova was their teacher, that's why they decided to become teachers too.

- The studying process depends on the clear work of I.A.Pryganova, L.K. Isaeyva and I.M.Mikhaloyva

- “... Silence. The first minutes of the new school year. In the 1”a” 42 pupils greet their teacher L.A. Lunina. She is in a mess too. She came to her pupils for the first time after finishing the institute.
- This year L.A. Lunina leads the 1st “A” to the top of knowledge too.

- Last year the pupils of N.G. Kokunova graduated the school. There were 4 medals in her class. Almost all the pupils continued their education in the institutes and colleges.
- This year N.G. Kokunova teaches the pupils of the 5th form. The children admire their teacher, they like her lessons a lot.

- We like Geography very much. On the lessons of L.D. Ivanova we travel around the world. The pupils of L.D. Ivanova always win geographical competitions.
- All the girls of our school adore the lessons of housekeeping.
- T.F.Vlasova teaches us to sew and to cook.
- S.V.Vasina – our first teacher.

Our school has changed a lot
There is a nice hall, a
modern canteen.

- There are comfortable
classes.

A beautiful flowerbed is in
front of the school.

- Many our pupils want to come back to school after finishing institutes and colleges. As their teachers did many years ago.
