

Module: Cartography  
and  
Geovisualization

# ONLINE AND MOBILE MAPS

By: Omirzhan Taukebayev  
o.taukebaev@gmail.com

Department of Cartography and Geoinformatics  
Al-Farabi Kazakh National University

# Aims and Objectives

Aims of the lesson to give students the opportunity to develop a good understanding of online maps and their features. At the end of the lesson, the student must:

- Know about online and mobile maps and their types
- Know about the possibilities of online maps
- How to use online and mobile maps

# Content

1. WHAT IS A MAP?
2. ONLINE MAPS
3. TYPES OF ONLINE MAPS
4. MOBILE MAPS
5. HOW IT'S WORK?
6. CONCLUSION

## **Teaching and learning methods:**

Lectures, lab work, self-study on articles in magazines

## **Required infrastructure:**

Class room with computer projector, computer laboratory with internet

## **Assessment :**

To pass this module, the students are required to complete all exercises; successfully present the final project

# What is a map?

A **map** is a visual representation of an area—a symbolic depiction highlighting relationships between elements of that space such as objects is a visual representation of an area—such as symbolic depictions highlighting relationships between elements of that space such as objects, relationships, boundaries, and themes.

# Online maps

Online maps Online maps can be basically divided by the covered area (global or local) and by the representation of this area (classic drawn or orthophoto).

# Global online maps

These maps cover the world, but may have insufficient details in some areas.

# Conclusion

## **The three most basic tasks of online maps:**

1. Navigation and Direction
2. Show relationships and trends in geo-hand
3. Showing attractions.

**Thank you for your attention!**
